

ADAPTIVE DIGITAL SAT PRACTICE TEST

Horizon Series — Form A

This practice test mirrors the adaptive structure of the Digital SAT. Section 1 (Reading & Writing) contains Module 1 (27 questions for all students), then branches into an Easier Module 2 or Harder Module 2 based on Module 1 performance. Section 2 (Math) follows the same adaptive structure with 22 questions per module.

Test Structure:

- Section 1 Module 1: 27 Reading & Writing questions (all students)
- Section 1 Module 2 Easier: 27 questions (~70% Easy/Medium, ~30% Hard)
- Section 1 Module 2 Harder: 27 questions (~30% Easy/Medium, ~70% Hard)
- Section 2 Module 1: 22 Math questions (all students)
- Section 2 Module 2 Easier: 22 questions (~70% Easy/Medium, ~30% Hard)
- Section 2 Module 2 Harder: 22 questions (~30% Easy/Medium, ~70% Hard)
- **Total: 147 original questions**

SECTION 1: READING AND WRITING

MODULE 1 (Same for all students — 27 Questions)

Question 1

Skill: Vocabulary in Context | Difficulty: Easy

The deep-sea drilling campaigns of the 1960s and 1970s recovered sediment cores from ocean floors worldwide, generating vast geological datasets. Researcher Tanya Mikhailova, who studies ancient volcanic eruptions recorded in these sediments, continues to analyze the drill samples, confirming that the expeditions' contributions to earth science are _____.

Which choice completes the text with the most logical and precise word or phrase?

- A) isolated
- B) enduring
- C) unprecedented
- D) provisional

Answer: B

Question 2

Skill: Vocabulary in Context | Difficulty: Easy

Because diatoms and other phytoplankton—photosynthetic microorganisms drifting in sunlit waters—are consumed by zooplankton as well as by juvenile fish and shellfish, phytoplankton are _____ pelagic food chains. Reduced phytoplankton density, which may be triggered by nutrient depletion, thus has a cascading negative effect on open-ocean ecosystems.

Which choice completes the text with the most logical and precise word or phrase?

- A) tangential to
- B) indistinguishable from
- C) fundamental to
- D) competitive with

Answer: C

Question 3

Skill: Vocabulary in Context | Difficulty: Easy

Certain novels invite dramatically varied readings—the works of Haruki Murakami can _____ as many distinct analyses as there are critics willing to engage with them—and provided that a reader's interpretation is not rooted in carelessness or willful distortion, it is difficult to claim that the reader has fundamentally misread the text.

Which choice completes the text with the most logical and precise word or phrase?

- A) dismiss

- B) generate
- C) constrain
- D) obscure

Answer: B

Question 4

Skill: Vocabulary in Context | Difficulty: Easy

The color vocabularies of many indigenous languages in the Amazon Basin tend toward the _____.: the Pirahã language of Brazil has been analyzed as containing only rough equivalents for light and dark, and the Dani language of Papua uses just two basic color terms, while the global average per language exceeds eleven.

Which choice completes the text with the most logical and precise word or phrase?

- A) sparse
- B) rigid
- C) uniform
- D) elaborate

Answer: A

Question 5

Skill: Main Purpose | Difficulty: Medium

Established in Edinburgh, Scotland, in 1826, the Royal Scottish Academy is devoted to promoting contemporary visual art produced by Scottish artists and artists working in Scotland. Since its founding, it has mounted over two thousand exhibitions of paintings, sculpture, and architecture. More recently established Scottish institutions dedicated to visual art include the Dundee Contemporary Arts center. Opened in Dundee in 1999, it focuses on international contemporary art with a particular emphasis on film and printmaking.

Which choice best states the main purpose of the text?

- A) To trace a historical development that led to the founding of two cultural organizations
- B) To compare the funding models of two Scottish art institutions
- C) To present information about two institutions, including each institution's area of focus
- D) To argue that one institution has a larger collection than the other

Answer: C

Question 6

Skill: Main Purpose | Difficulty: Medium

The following text is adapted from William Cullen Bryant's 1821 poem "Green River." The poem is a tribute to a river near the poet's hometown in western Massachusetts.

*Though forced to drudge for the dregs of men,
And scrawl strange words with the barbarous pen,
And mingle among the jostling crowd,
Where the sons of strife are subtle and loud—*

*I often come to this quiet place,
To breathe the airs that ruffle thy face,
And gaze upon thee in silent dream.*

Which choice best states the main purpose of the text?

- A) It describes the speaker's daily routine of visiting the river for exercise.
- B) It contrasts the peacefulness of the river with the harshness of the speaker's working life.
- C) It emphasizes the danger of the river during storm season.
- D) It compares the appearances of two different rivers.

Answer: B

Question 7

Skill: Reading Comprehension | Difficulty: Medium

In northern Australia, the Yolngu people operate the Buku-Larrngay Mulka Centre, a community-controlled art center and museum. Drawing on traditional law and ceremony to guide its exhibitions, this institution presents Yolngu cultural heritage to visitors on the community's own terms. The Tiwi Design collective on Bathurst Island employs a similar community-led approach in its own cultural space. Both centers contrast with museums that are not community-controlled; when displaying Indigenous Australian artifacts, such museums tend to anticipate primarily non-Indigenous visitors and rely on Western curatorial frameworks for organizing displays.

According to the text, what is one way that non-community-controlled museums typically differ from the cultural centers operated by the Yolngu and Tiwi communities?

- A) The museums typically display fewer artifacts in their exhibitions.
- B) The museums are generally smaller in physical size.
- C) The museums are primarily designed for non-Indigenous audiences.
- D) The museums focus exclusively on historical rather than contemporary art.

Answer: C

Question 8

Skill: Reading Comprehension | Difficulty: Medium

The Galápagos archipelago is home to the flightless cormorant (*Nannopterum harrisi*), one of the world's rarest seabirds. Due to the islands' distinctive marine and terrestrial conditions, the flightless cormorant became highly specialized as it adapted to forage in the nutrient-rich coastal waters surrounding the volcanic islands. However, like many highly specialized species, the flightless cormorant is particularly vulnerable to environmental disruptions, such as El Niño events, oil spills, and introduced predators, that upset the delicately balanced ecosystems on which the birds depend.

Based on the text, why is the flightless cormorant a highly specialized species?

- A) It lives exclusively in the deepest coastal waters surrounding the Galápagos.
- B) It evolved to thrive in a particular habitat found in the Galápagos archipelago.
- C) It adapted over time to share its habitat with other specialized seabird species.
- D) It inhabits an ecosystem that faces numerous environmental threats.

Answer: B

Question 9

Skill: Main Idea | Difficulty: Medium

The following text is adapted from Willa Cather's 1913 novel *O Pioneers!* The narrator describes a winter landscape on the Nebraska prairie.

The main street of the little town was deserted. The wind had already begun to pile the snow into drifts along the board sidewalks. The few pedestrians astir wrapped themselves to the eyes. I drove along the ridge of the Divide, looking down at the brown, frost-bitten fields below. The land was so flat that one could see the distant church steeples. The frozen country seemed to press in upon me, yet as the road turned south the wind fell and the prairie opened out before me, wide and still, like a great sheet of iron under the grey sky.

Which choice best states the main idea of the text?

- A) The narrator contrasts feelings of unease with a growing sense of spaciousness as the landscape shifts along the drive.
- B) The narrator is eager to escape the cold weather and is frustrated by the length of the journey.
- C) Although the narrator did not plan to travel through the countryside, the experience proves exhilarating.
- D) The narrator observes that the town and the surrounding prairie are equally desolate in winter.

Answer: A

Question 10

Skill: Data Interpretation | Difficulty: Medium

[Graph: A line graph titled "Mean Wetland Area for Three Habitat Classifications in the Murray-Darling Basin, Australia" shows years 1975–2015 on the x-axis, mean wetland area (hectares) 0–200 on the y-axis. Class A (solid/triangles): ~180 in 1975, drops to ~40 by 1995, stays ~50. Class B (dashed/squares): ~100 in 1975, drops to ~30 by 1995, rises to ~45. Class C (dotted/circles): ~60 in 1975, drops to ~35 by 1995, drops to ~25 then ~30.]

To document the impact of prolonged drought on wetland ecosystems in the Murray-Darling Basin, researcher Kiera Thornton used satellite imagery to track changes in mean wetland area across habitat classifications. Sustained rainfall reductions in the 1980s and 1990s caused significant contraction in all wetland types. By 1995, mean wetland areas had dropped considerably. In that year, they were between _____.

Which choice most effectively uses data from the graph to complete the assertion?

- A) 100 and 150 hectares.
- B) 60 and 80 hectares.
- C) 30 and 45 hectares.
- D) 140 and 180 hectares.

Answer: C

Question 11

Skill: Data Interpretation | Difficulty: Medium

[Graph: A line graph titled “Insect Populations in a Welsh Meadow, March–December 2003” with months on x-axis, number observed (0–80) on y-axis. Meadow brown butterfly (solid/triangles): ~75 March, ~5 June, ~3 Sept, ~5 Dec. Common blue damselfly (dashed/squares): ~10 March, ~15 June, ~12 Sept, ~20 Dec. Hoverfly (dotted/circles): ~0 March, ~8 June, ~10 Sept, ~5 Dec.]

Eleri Griffiths and colleagues monitored insect populations in a meadow in Wales. They found that some species were entirely absent at particular times; for example, they did not observe even one _____.

Which choice most effectively uses data from the graph to complete the example?

- A) meadow brown butterfly in June of 2003.
- B) hoverfly in March and December of 2003.
- C) common blue damselfly in September of 2003.
- D) meadow brown butterfly in December of 2003.

Answer: B

Question 12

Skill: Weaken a Hypothesis | Difficulty: Hard

Marine biologist Dr. Sayaka Ito examined otoliths of two reef fish species collected near Okinawa. Specimens labeled R-22, whose otolith growth rings formed during the juvenile stage, exhibited a chemical signature suggesting the fish had inhabited waters at 30 meters depth, while Okinawan reef fish of this species typically remain at depths of at least 50 meters. Because water temperature increases as depth decreases, a graduate student hypothesized that the Okinawan reef fish develop in warmer water than their counterparts near Palau do.

Which finding, if true, would most directly weaken the student’s hypothesis?

- A) Okinawan reef fish tend to migrate to deeper water immediately after the juvenile stage, whereas Palauan reef fish do not.
- B) The water temperature at a given depth tends to be higher in waters near Palau than at that depth near Okinawa.
- C) There are not enough suitable shallow habitats near Palau for juvenile reef fish to develop at 30 meters.
- D) The water temperature at a given depth tends to be lower near Palau than at that depth near Okinawa.

Answer: B

Question 13

Skill: Logical Completion | Difficulty: Hard

Numerous studies have identified a positive correlation between soil nitrogen content and plant species diversity in temperate grasslands across Western Europe. But Dr. Ingrid Halvorsen and Lars Ekman did not observe this correlation in Scandinavia, leading some ecologists to hypothesize that the pattern is restricted to Western Europe. However, Dr. Jun Tanaka reported nitrogen and diversity rising or falling together in Japan, and several other non-European studies yielded similar results, suggesting that _____.

Which choice most logically completes the text?

- A) ecological characteristics unique to Scandinavia likely result in both metrics being significantly higher there than elsewhere.

- B) the Scandinavian grasslands may be more similar to Western European ones than to those in Japan.
- C) there may be circumstances specific to the Scandinavian grasslands that disrupted a general positive association between soil nitrogen and species diversity.
- D) grasslands outside Western Europe are more likely to show a negative association than a positive one.

Answer: C

Question 14

Skill: Logical Completion | Difficulty: Hard

Dr. Meiling Chen et al. analyzed historical irrigation scaling trends circa 500 CE in East Asia, focusing on water management in ancient agricultural settlements. They examined communities across East Asia, with groupings based on regionally distinct political structures, crop types, and geographic constraints—including centrally administered rice-paddy systems of the Yangtze Delta, merchant-organized terrace farming in the Yunnan highlands, and village-managed canal systems in the Mekong lowlands. A prevalent trend emerged: as a settlement's total irrigated area increased, so did canal density in core agricultural zones. This finding implies that _____.

Which choice most logically completes the text?

- A) even when there were substantial inter-regional differences in agricultural systems, these had a limited effect on irrigation patterns in ancient East Asian settlements.
- B) the observed relationship is heavily influenced by characteristics particular to ancient East Asia, making it unlikely a similar relationship would be found elsewhere.
- C) variations in political and crop-type interests had less effect within regions than between regions of East Asia.
- D) despite regional differences in political and agricultural systems, ancient East Asian settlements shared common geographic constraints that encouraged high canal density.

Answer: D

Question 15

Skill: Pronoun Agreement | Difficulty: Medium

After extensive deliberation, _____ reached a consensus: the committee for the 1952 Pulitzer Prize in Fiction would award that year's prize to Herman Wouk for his sweeping novel set during World War II, praised for its vivid characterization and masterful narrative scope.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) anyone
- B) you
- C) they
- D) it

Answer: C

Question 16

Skill: Pronoun Reference | Difficulty: Medium

In September of 1971, the television program *All in the Family* was a cultural phenomenon. Having dominated the ratings for three consecutive months, _____ ranked No. 1 on the Nielsen chart of most-watched television shows.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) those
- B) they
- C) each
- D) it

Answer: D

Question 17

Skill: Sentence Structure | Difficulty: Medium

In 1851, the novel *Moby-Dick* was published under the name Herman Melville. Today, we recognize that _____

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) the author's ambition was to write an American epic?
- B) the author's ambition was to write an American epic.
- C) was the author's ambition to write an American epic.
- D) the author's ambition was to write an American epic?

Answer: B

Question 18

Skill: Punctuation | Difficulty: Medium

While the Iberian lynx (*Lynx pardinus*) can be found in scattered reserves across southern Spain and parts of Portugal in _____ than 90 percent of this critically endangered cat's population is concentrated in the Andalusia region. There, wildlife veterinarian Dr. Rosa Mendez leads a captive-breeding initiative.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) Europe, more
- B) Europe; more
- C) Europe. More
- D) Europe more

Answer: A

Question 19

Skill: Possessives and Plurals | Difficulty: Medium

India and Mexico have two of the longest national anthems in the world. At 52 lines and 40 lines, respectively, these _____ according to research by musicologists Dr. Priya Sharma and David Cohen, correlate with periods of intense nationalist sentiment during which the anthems were composed.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) anthems' length,
- B) anthems lengths,
- C) anthem's length,
- D) anthems' lengths,

Answer: B

Question 20

Skill: Punctuation | Difficulty: Medium

A lone figure gazes across a harbor in *Lighthouse at Two Lights*, an oil painting by American _____ Edward Hopper.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) artist:
- B) artist
- C) artist—
- D) artist,

Answer: B

Question 21

Skill: Transitions | Difficulty: Medium

Every Canadian province has an associated official mineral, which is typically chosen by a panel of geologists and then ratified by the provincial legislature. For example, British Columbia's jade was formally designated in 1968, and Ontario's amethyst in 1975. _____ years elapse between a mineral's selection and its official recognition, as the legislative process can be remarkably slow.

Which choice completes the text with the most logical transition?

- A) Often,
- B) Therefore,
- C) Similarly,
- D) Indeed,

Answer: A

Question 22

Skill: Transitions | Difficulty: Medium

A 1995 study of flocking starlings observed the birds mimicking the flight direction of nearby flock-mates, rapidly banking away from an approaching hawk. This is an example of a social coordination mechanism that benefits the group. _____ the avian world is at times susceptible to the propagation of errors, often with costly outcomes: a 2012 study of migrating geese concluded that following erroneous course corrections by lead birds caused the flock to deviate from efficient routes unnecessarily.

Which choice completes the text with the most logical transition?

- A) In other words,
- B) Conversely,
- C) Indeed,
- D) Consequently,

Answer: A

Question 23

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching a topic, a student has taken the following notes:

- *Nighthawks* is a 1942 oil-on-canvas painting by American artist Edward Hopper.
- It depicts four figures in a late-night diner.
- Oil painting is a technique in which pigments are mixed with a drying oil, typically linseed oil.
- The mixture is then applied to a prepared canvas or panel surface.
- Fresco painting is a different technique that applies pigments to wet plaster on a wall.

The student wants to describe the process of oil painting. Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Oil painting uses linseed oil and other drying oils, not just wet plaster.
- B) Hopper used oil-on-canvas, applying pigments mixed with oil onto canvas.
- C) Hopper used oil painting to create the 1942 work *Nighthawks*.
- D) In oil painting, pigments are combined with a drying oil and then applied onto a prepared canvas or panel.

Answer: D

Question 24

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching a topic, a student has taken the following notes:

- Generally, a country's tallest building is located in its capital city.
- The capital of Malaysia is Kuala Lumpur.
- Malaysia's tallest building, the Merdeka 118 tower, is in Kuala Lumpur.
- The capital of Australia is Canberra.
- Australia's tallest building, however, is located in Melbourne, not Canberra.

The student wants to emphasize a difference between the two countries. Which choice most effectively uses relevant information from the notes?

- A) In both Malaysia and Australia, the tallest building is not in the capital city.
- B) While Malaysia's tallest building is in its capital, Kuala Lumpur, Australia's tallest building is in Melbourne rather than its capital, Canberra.
- C) The tallest building in Malaysia, Merdeka 118, is in Kuala Lumpur, and Australia's capital is Canberra.
- D) Malaysia's capital is Kuala Lumpur; Australia's capital is Canberra.

Answer: B

Question 25

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching a topic, a student has taken the following notes:

- Journalist Sonia Nazario’s book *Enrique’s Journey* is about child migration from Central America.
- Central American child migration surged in the early 2000s with tens of thousands of unaccompanied minors.
- To document this, Nazario retraces the journey of a Honduran teenager named Enrique, among others.
- The book won the Grand Prize of the Robert F. Kennedy Book Award in 2007.
- It was also a Pulitzer Prize finalist in 2007.

Which choice most effectively uses information to emphasize how Nazario documents child migration?

- A) Honduras is one of the countries from which children migrated to the United States.
- B) Sonia Nazario chronicles child migration in personal detail by retracing the journey of individuals, such as the Honduran teenager Enrique.
- C) In 2007, Nazario’s book won the Robert F. Kennedy Book Award and was a Pulitzer finalist.
- D) The journey of Enrique is featured in the award-winning book *Enrique’s Journey*.

Answer: B

Question 26

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching a topic, a student has taken the following notes:

- Yo-Yo Ma is a French-American cellist and composer.
- His acclaimed albums feature many distinguished guest artists.
- Pianist Kathryn Stott performed on his 2015 album, *Songs of Comfort and Hope*.
- Guitarist Carlos Santana performed on his 2008 album, *Songs of Joy and Peace*.

The student wants to emphasize a similarity between Kathryn Stott and Carlos Santana. Which choice most effectively uses the notes?

- A) Stott performed on Ma’s 2015 album, released seven years after *Songs of Joy and Peace*.
- B) *Songs of Comfort and Hope* and *Songs of Joy and Peace* are albums by Yo-Yo Ma.
- C) Although both performed on Ma’s albums, Stott played piano whereas Santana played guitar.
- D) Kathryn Stott and Carlos Santana both contributed their musical talents to albums by Yo-Yo Ma.

Answer: D

Question 27

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching a topic, a student has taken the following notes:

- Roberto Clemente (1934–1972) was a baseball player born in Carolina, Puerto Rico.
- He was the first Caribbean-born player inducted into the Baseball Hall of Fame.
- Early in his career, he played in limited, low-profile minor league games, such as his stint with the Montreal Royals (1954).
- Later, he became one of the most celebrated outfielders in Major League history with the Pittsburgh Pirates (1955–1972).

The student wants to make and support a generalization about Clemente's early career. Which choice most effectively uses the notes?

- A) His stint with the Montreal Royals (1954) came early, whereas Pittsburgh came later.
- B) Roberto Clemente's earliest professional appearances were modest and low-profile, such as his stint with the Montreal Royals in 1954, where he played in limited games.
- C) Both the Montreal Royals and the Pittsburgh Pirates are teams that include Clemente.
- D) With the Montreal Royals in 1954, Clemente played in limited minor league games.

Answer: B

SECTION 1: READING AND WRITING

MODULE 2 — EASIER PATH (27 Questions)

For students scoring below ~60% on Module 1 — ~70% Easy/Medium, ~30% Hard

Question 1

Skill: Vocabulary in Context | Difficulty: Easy

Despite vocal support from environmental groups, the proposed marine conservation act gained little traction in the legislature during the 2010s, largely because lawmakers lacked data from developing coastal nations. Advocates would later _____ this gap by partnering with researchers in Southeast Asia and East Africa.

Which choice completes the text with the most logical and precise word or phrase?

- A) reinforce
- B) address
- C) classify
- D) assume

Answer: B

Question 2

Skill: Vocabulary in Context | Difficulty: Easy

Although the metabolic processes of deep-sea bacteria have received limited formal investigation, indirect measurements have suggested that these organisms generate internal temperatures above their surroundings. Laboratory findings by Dr. Akira Sato et al. now _____ this idea: cultured colonies maintained elevated metabolic heat relative to incubation chambers.

Which choice completes the text with the most logical and precise word or phrase?

- A) contradict
- B) confirm
- C) summarize
- D) limit

Answer: B

Question 3

Skill: Vocabulary in Context | Difficulty: Easy

The pacing of Kurosawa's epic films is notably measured and contemplative. Georgian filmmaker Otar Iosseliani has acknowledged that his meditative works may lull viewers to sleep. This might imply tedium, but slow pacing does not necessarily produce boredom: deliberate rhythm generates focused alertness, and thus induces not torpor but _____.

Which choice completes the text with the most logical and precise word or phrase?

- A) resilience

- B) agitation
- C) serenity
- D) attentiveness

Answer: D

Question 4

Skill: Vocabulary in Context | Difficulty: Easy

Challenges in recording nocturnal amphibian calls and a prevailing emphasis on diurnal species have resulted in _____ of data on nighttime vocalization patterns, but Dr. Elena Vasquez has begun to close this gap by deploying automated acoustic monitors.

Which choice completes the text with the most logical and precise word or phrase?

- A) a surplus
- B) a collection
- C) a scarcity
- D) a misrepresentation

Answer: C

Question 5

Skill: Text Structure | Difficulty: Easy

Vertical inheritance involves the transfer of cultural knowledge from elder to younger generation; horizontal transmission involves sharing between contemporaries. While vertical transmission is common in apprenticeship-based crafts, it has rarely been documented among peer-learning communities. However, new research suggests that horizontal cultural transmission is more prevalent in craft communities than originally assumed.

Which choice best states the function of the underlined sentence in the text as a whole?

- A) It implies that a common understanding of horizontal cultural transmission may be inaccurate.
- B) It compares the rates at which horizontal transmission has been observed in two types of communities.
- C) It argues that a particular line of research is unlikely to yield results.
- D) It distinguishes between horizontal and vertical cultural transmission.

Answer: A

Question 6

Skill: Main Purpose | Difficulty: Medium

Middlemarch, first published serially in 1871–1872, is a novel in George Eliot’s body of work. Some critics have found fault with its expansive scope, saying it meanders and loses narrative focus. But other critics argue the novels should not be thought of as loosely structured but as intricately woven tapestries, similar to Balzac’s *La Comédie humaine*.

Which choice best states the main purpose of the text?

- A) To present a reason the length of *Middlemarch* makes it challenging

- B) To argue that Eliot’s novels should have the reputation of *La Comédie humaine*
- C) To describe a characteristic of Eliot’s novels and offer two differing viewpoints on it
- D) To explain why critics find Eliot’s novels entertaining despite structural flaws

Answer: C

Question 7

Skill: Text Structure | Difficulty: Medium

With its blend of blues and country influences, “Folsom Prison Blues” is representative of Johnny Cash’s recordings in the mid-1950s and early 1960s. Through songs straddling these genres, he achieved his greatest early recognition. A decade earlier, however, Cash had first honed his skills as a gospel singer in rural Arkansas. The imprint of this sacred music tradition can be detected in “I Walk the Line.”

Which choice best describes the overall structure of the text?

- A) It explores Cash’s lifelong interest in gospel music, then debates whether country music influenced his work.
- B) It discusses a particular period in Cash’s career, then considers the music of an earlier period.
- C) It enthusiastically recommends Cash’s earliest recordings, then expresses disappointment with later ones.
- D) It praises one song, then notes how similar it is to a song Cash recorded earlier.

Answer: B

Question 8

Skill: Cross-Text Analysis | Difficulty: Medium

Text 1

Research on psychological benefits of exercise has traditionally concentrated on structured workouts, but kinesiologist Dr. Amara Osei has demonstrated that incidental physical activity—such as walking to a bus stop—also contributes measurably to improved mood. Greater positive affect was reported by participants who incorporated more incidental movement.

Text 2

Exercise psychology commonly draws on a framework categorizing physical activity along three intensity levels: sedentary (watching TV), light (casual walking), and vigorous (competitive running).

Based on the texts, what would Osei (Text 1) most likely say about the framework in Text 2?

- A) It highlights that most research overlooks a category of physical activity that can improve emotional well-being.
- B) It reflects an overemphasis on vigorous activity in evaluations of exercise importance.
- C) It explains observations that individuals expect structured workouts to be more mood-enhancing than incidental movements.
- D) It emphasizes distinctions among types of vigorous activity not adequately represented in exercise research.

Answer: A

Question 9

Skill: Cross-Text Analysis | Difficulty: Easy

Text 1

From the ancient giant wombat to the living koala, marsupials are among Australia's most distinctive mammals. But zoologists still have much to learn. Today's marsupials spend much of their early development in pouches. The pouch's inaccessibility has made it difficult to study neonatal development.

Text 2

By using miniature thermal sensors, Dr. Hannah Liu can now monitor temperature fluctuations within marsupial pouches. Such sensors can revise misconceptions. It was assumed pouch temperatures were constant. But pouch temperatures in wild kangaroos fluctuate by up to 4°C over 24 hours.

The author of Text 1 and Text 2 both discuss which topic?

- A) How extinct marsupials compare with living marsupials
- B) Scientists' efforts to understand marsupials
- C) The benefits of attaching monitoring devices to marsupials
- D) Changes in marsupial habitats

Answer: B

Question 10

Skill: Inference | Difficulty: Medium

Humpback whales consume up to 1.5% of their body mass in krill per day. So a 30,000 kg humpback could eat 450 kg, while a 150,000 kg blue whale could consume 2,250 kg. Over the past century, baleen whale populations have declined, and—contrary to expectations—so have krill populations. Dr. Smetacek explains that great whales recycle iron through fecal plumes, fertilizing phytoplankton blooms that sustain krill.

Based on the text, what can most reasonably be concluded about humpback and blue whales?

- A) As humpback whale krill consumption has decreased, blue whale krill consumption has increased.
- B) The blue whale is able to consume more krill per day than the humpback whale.
- C) Both can eat krill, but only the humpback can also eat small fish.
- D) Both populations have declined due to decreasing ocean iron levels.

Answer: B

Question 11

Skill: Data Interpretation | Difficulty: Medium

[Graph: Grouped bar chart showing correlation between algorithm-predicted and user-reported satisfaction ratings for Classical and Electronic music. Three users: U5, U1, U2. For Classical: U5~0.25, U1~0.38, U2~0.55. For Electronic: U5~0.27, U1~0.22, U2~0.25.]

Dr. Nakamura developed a model to predict song enjoyment on a 1–4 scale, then recruited participants to rate songs. The team computed correlation between predicted and reported ratings. Assuming U1 and U2 gave equal ratings to classical tracks, the graph indicates the model predicted _____.

Which choice most effectively uses data from the graph to complete the statement?

- A) U1's and U2's classical ratings would equal one another.

- B) U1's and U2's classical ratings would differ from one another.
- C) U1 would derive more satisfaction from classical than from electronic tracks.
- D) U1 would derive less satisfaction from classical than from electronic tracks.

Answer: C

Question 12

Skill: Textual Evidence | Difficulty: Hard

A Doll's House is an 1879 play by Henrik Ibsen. In the play, Torvald Helmer has been promoted at the bank, and his wife Nora conceals the fact that she once forged a signature to save his life. Ibsen portrays Nora's tension as increasingly unbearable, as is evident when _____.

Which quotation from a translation most effectively illustrates the claim?

- A) Torvald says, "Is it my little squirrel bustling about? Don't disturb me."
- B) Nora says to herself, "Corrupt my own children? Poison my home? It can never, never be true."
- C) Torvald says of a colleague, "He is morally lost, and yet he goes on living."
- D) Dr. Rank tells Nora, "There is one last thing I should like to do."

Answer: B

Question 13

Skill: Weaken a Hypothesis | Difficulty: Hard

Certain industrial processes release TiO₂ nanoparticles into waterways. Dr. Bergström found TiO₂-NPs accumulate in earthworms. It has been hypothesized that TiO₂-NP monitoring in earthworms could serve as a proxy, replacing costly sampling of vertebrate species like European moles, commonly used in regulatory soil-quality testing.

Which finding, if true, would most directly weaken the hypothesis?

- A) Compared with moles, earthworms can accumulate TiO₂-NPs with significantly fewer negative health effects.
- B) The rate of TiO₂-NP uptake in earthworms differs from that in moles in a way not yet understood.
- C) Earthworms accumulate several other nanoparticle types, whereas moles accumulate only TiO₂-NPs.
- D) When both species are exposed to similar TiO₂-NP levels, concentrations show little variation.

Answer: A

Question 14

Skill: Support a Claim | Difficulty: Hard

Dr. Alvarez investigated bioluminescence in deep-sea squid during simulated predator encounters. 40% of tested species produced light in three patterns: steady glows, rapid flashes, and pulsing waves. Two species released bioluminescent ink and exclusively produced rapid flashes. Alvarez argues bioluminescence in ink-releasing species functions primarily to startle predators.

Which finding, if true, would most directly support Alvarez's claim?

- A) Brief, intense light bursts like rapid flashes tend to be especially effective in triggering a startle reflex in deep-sea predators.
- B) Ink-producing squid generate bioluminescence at a higher intensity than non-ink-producing squid.
- C) Rapid flashes are particularly visible to sharks and large fish.
- D) Sperm whales halt attacks in response to bioluminescent signals of any duration.

Answer: A

Question 15

Skill: Logical Completion | Difficulty: Medium

Archaeologists assume that population displacement interrupts intergenerational craft transmission, causing simultaneous declines in multiple crafting traditions. Inventories from the Indus Valley show a steep decline around 1900 BCE in carnelian bead-drilling, an advanced technique. But advanced bronze-casting and most other traditions continued to flourish, suggesting that _____.

Which choice most logically completes the text?

- A) disruptions in bead-drilling likely occurred in the context of demographic continuity in the Indus Valley.
- B) a simultaneous decline in multiple traditions is less likely to indicate disrupted expertise transmission.
- C) peoples continued to uphold multiple traditions even as population shifts occurred.
- D) cross-cultural exchange likely explains the expansion of bronze-casting beginning around 1900 BCE.

Answer: A

Question 16

Skill: Verb Form | Difficulty: Medium

In a chapter from Matsuo Bashō's *The Narrow Road to the Deep North*, the author marvels at a polished floor, wind chimes, and a child's laughter. Such observations, recorded by Bashō as he journeyed through seventeenth-century Japan, _____ the ephemeral beauty of everyday moments.

Which choice completes the text so that it conforms to Standard English?

- A) illuminates
- B) was illuminating
- C) to illuminate
- D) illuminate

Answer: D

Question 17

Skill: Punctuation | Difficulty: Easy

Citing the example of Athena, the philosopher Porphyry theorized that all Greek deities—including Poseidon, the god of the sea; Hermes, the god of trade; and the god of the forge, _____ may have been historical rulers who underwent deification.

Which choice completes the text so that it conforms to Standard English?

- A) Hephaestus;

- B) Hephaestus—
- C) Hephaestus,
- D) Hephaestus

Answer: C

Question 18

Skill: Verb Form | Difficulty: Medium

Classified as a spondee, the word “sunlight” consists of two equally stressed syllables. The word “guitarist,” by contrast, consists of one unstressed syllable followed by two stressed syllables, a metrical foot _____ to in English prosody as an anapest.

Which choice completes the text so that it conforms to Standard English?

- A) referred
- B) is referred
- C) referring
- D) refers

Answer: B

Question 19

Skill: Punctuation | Difficulty: Medium

The libraries of Portland, Oregon, seem to foster greater civic engagement. In a 2021 study, researchers investigating the connection between library branch locations and voter participation _____ analyzed geotagged voter registration data from various neighborhoods. They found neighborhoods with library branches had higher voter registration rates.

Which choice completes the text so that it conforms to Standard English?

- A) conducted and the study’s scope
- B) conducted, and the study’s scope
- C) conducted and the study’s scope,
- D) conducted, and the study’s scope,

Answer: B

Question 20

Skill: Punctuation | Difficulty: Medium

With a generating capacity of 48 megawatts, the Hellishóíði geothermal plant in Iceland provides reliable renewable energy. Plants like Hellishóíði supply a substantial fraction of Iceland’s _____ the rarity of locations with the required volcanic activity and permeable rock limiting broader adoption.

Which choice completes the text so that it conforms to Standard English?

- A) electricity; though,
- B) electricity, though;
- C) electricity, though

D) electricity, though,

Answer: C

Question 21

Skill: Transitions | Difficulty: Easy

The album *Buena Vista Social Club* received widespread praise for its celebration of son cubano, a genre featuring layered harmonies and guitar-driven rhythms. _____ few were surprised when it won the Grammy for Best Tropical Latin Album in 1998.

Which choice completes the text with the most logical transition?

- A) Often,
- B) Therefore,
- C) Nevertheless,
- D) Granted,

Answer: B

Question 22

Skill: Transitions | Difficulty: Easy

In 1925, the Coast and Geodetic Survey calculated Montana's geographic center using only a plaster model and a balancing pin. _____ this seemingly imprecise method yielded a remarkably accurate result: the 1925 center diverged from a satellite-computed center by just a few kilometers.

Which choice completes the text with the most logical transition?

- A) Still,
- B) Similarly,
- C) In other words,
- D) Fittingly,

Answer: A

Question 23

Skill: Transitions | Difficulty: Medium

In an ekphrastic novel, a writer engages with a visual artwork. Tracy Chevalier's *Girl with a Pearl Earring* imagines the story behind Vermeer's 1665 painting; Michael Cunningham's *Specimen Days*, _____ takes as its touchstone a Walt Whitman poem rather than a visual artwork.

Which choice completes the text with the most logical transition?

- A) nevertheless,
- B) conversely,
- C) likewise,
- D) hence,

Answer: B

Question 24

Skill: Rhetorical Synthesis | Difficulty: Easy

While researching: • Choreographers design and arrange dance movements. • They work with dancers to translate artistic visions. • *Swan Lake* (1877) was choreographed by Julius Reisinger. • Twyla Tharp choreographed dance sequences for productions.

The student wants to provide an example of a production a choreographer worked on. Which choice is most effective?

- A) Choreographer Twyla Tharp worked with dancers to translate artistic visions.
- B) The 1877 production of *Swan Lake* is one example of Julius Reisinger's work as a choreographer.
- C) In dance, choreographers design and arrange movements.
- D) Twyla Tharp works with dancers to translate a director's vision into movement.

Answer: B

Question 25

Skill: Rhetorical Synthesis | Difficulty: Easy

While researching: • The Mandarin word “yuan” comes from the Chinese character meaning “round.” • Multiple East Asian currencies use some form of this word. • China's currency is the renminbi, with the basic unit called the yuan.

The student wants to provide an example of a country using “yuan” in its currency name. Which choice is most effective?

- A) The Chinese character meaning “round” is the origin of “yuan.”
- B) Several countries use a form of “yuan” in naming their currencies.
- C) China uses the yuan as the basic unit of its national currency, the renminbi.
- D) China does not refer to its currency by the original Chinese character.

Answer: C

Question 26

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching: • The ratio of an element's mass to the combined mass of all elements is the mass fraction. • Silicon's mass fraction in Earth's crust is 277,000 ppm (27.7%). • The mole fraction is the ratio of atom count. • Silicon's mole fraction is ~20.5%.

The student wants to emphasize a similarity between mass fraction and mole fraction. Which choice is most effective?

- A) Silicon's mass fraction is 277,000 ppm, or 27.7%, and its mole fraction is about 20.5%.
- B) While mass fraction measures relative mass and mole fraction measures relative atom count, both indicate relative abundance of elements.
- C) Both express silicon's abundance as a ratio to the total.
- D) The mass fraction indicates relative mass; the mole fraction indicates relative atom number.

Answer: B

Question 27

Skill: Rhetorical Synthesis | Difficulty: Medium

While researching: • Architect Zaha Hadid (1950–2016) was born in Baghdad. • She was the first woman to receive the Pritzker Architecture Prize. • Early in her career, she produced many unbuilt designs, such as her Peak competition entry (Hong Kong, 1983). • Later, she realized iconic structures like the Heydar Aliyev Center (Baku, 2012).

The student wants to generalize about Hadid's early career. Which choice is most effective?

- A) Her Peak entry (1983) came early; the Heydar Aliyev Center came later.
- B) Hadid's earliest works were largely theoretical and unrealized, such as her visionary 1983 Peak competition entry, which was never constructed.
- C) Both the Peak entry and Heydar Aliyev Center are by Hadid, the first woman to win the Pritzker Prize.
- D) For the Peak competition in Hong Kong in 1983, Hadid produced an unbuilt design.

Answer: B

SECTION 1: READING AND WRITING

MODULE 2 — HARDER PATH (27 Questions)

For students scoring above ~60% on Module 1 — ~30% Easy/Medium, ~70% Hard

Question 1

Skill: Vocabulary in Context | Difficulty: Hard

Although conventional wisdom held that Ottoman mosque design was monolithically derived from Byzantine precedents, recent scholarship by Dr. Fatma Özkan has demonstrated that provincial Ottoman architects in the Balkans frequently _____ local Slavic building traditions, incorporating steeply pitched timber roofing and asymmetrical courtyard plans.

Which choice completes the text with the most logical and precise word or phrase?

- A) repudiated
- B) assimilated
- C) catalogued
- D) supplanted

Answer: B

Question 2

Skill: Vocabulary in Context | Difficulty: Hard

The notion that mycorrhizal networks facilitate directional nutrient transfer from established trees to struggling seedlings has achieved wide currency in popular science. However, Dr. Justine Karst argues that empirical support for this claim remains _____.: most studies have been conducted under controlled conditions that poorly replicate natural forest conditions.

Which choice completes the text with the most logical and precise word or phrase?

- A) tenuous
- B) voluminous
- C) irrelevant
- D) unambiguous

Answer: A

Question 3

Skill: Main Purpose | Difficulty: Hard

The compositional approach of *Migrations*, a 2020 orchestral work by Cherokee-Creek composer Jerod Tate, aligns more closely with post-minimalist concert music than with Southeastern Woodlands Indigenous music. Few listeners would deduce from its sonic texture that its composer is Indigenous. In contrast, Diné composer Connor Chee builds compositions from Navajo chant melodies. Thus in Chee's work, classical form has the effect of _____.

Which choice most logically completes the text?

- A) rendering Indigenous musical identity more legible than it is in *Migrations*.
- B) asserting the Indigenous origins of motifs associated with post-minimalism.
- C) challenging the dominance of European American composers.
- D) reconciling Indigenous and European American influences that coexist uneasily in *Migrations*.

Answer: A

Question 4

Skill: Logical Completion | Difficulty: Hard

Historians of technology assume that geopolitical disruption interrupts technical expertise circulation, manifesting as simultaneous patent complexity reductions. Rhineland patent archives from 1910–1950 show a steep drop around 1918 in precision optical grinding patents. But advanced chemical synthesis patents continued at pre-war rates, suggesting that _____.

Which choice most logically completes the text?

- A) disruptions in optical patents likely occurred amid continuity in the broader Rhineland engineering workforce.
- B) a simultaneous decline across multiple engineering domains is less likely to indicate disrupted expertise circulation.
- C) engineers continued to uphold multiple traditions even as geopolitical disruptions occurred.
- D) cross-border exchange likely explains the expansion of chemical synthesis beginning around 1918.

Answer: A

Question 5

Skill: Inference | Difficulty: Hard

Leafcutter ants cultivate fungal gardens for food. When gardens become contaminated with the parasitic mold *Escovopsis*, worker ants selectively remove infected portions, even though this temporarily reduces food supply. Researchers argue this weeding behavior, while costly short-term, is adaptive because _____.

Which choice most logically completes the text?

- A) the colony can compensate by foraging for alternative vegetation.
- B) workers consume *Escovopsis* directly as an alternative protein source.
- C) an unchecked infection would destroy the entire garden, permanently eliminating the colony's sole food source.
- D) discarded material can be recycled by other soil insect species.

Answer: C

Question 6

Skill: Weaken a Hypothesis | Difficulty: Hard

Dr. Ramaswamy observed that congestion pricing in European cities coincided with increased public transit ridership. She hypothesizes that congestion pricing directly causes commuters to switch to transit. However, the cities studied had simultaneously invested in substantial transit improvements.

Which finding, if true, would most directly weaken her hypothesis?

- A) In cities with comparable transit improvements but no congestion pricing, ridership increased by a similar magnitude.
- B) The congestion pricing fees were set at moderate levels.
- C) Some commuters reported switching to transit primarily because of the fees.
- D) The cities experienced a slight overall decrease in total commuting trips.

Answer: A

Question 7

Skill: Cross-Text Analysis | Difficulty: Hard

Text 1

Dr. Kaplan found that 20 minutes in green spaces significantly improved attention restoration compared to urban settings. Natural environments engage involuntary attention, allowing directed-attention mechanisms to recover.

Text 2

Dr. Joye argues that benefits attributed to nature may partially stem from reduced sensory complexity and lower noise rather than intrinsic restorative properties. Carefully designed quiet urban spaces can produce comparable attention benefits.

How would Joye (Text 2) most likely respond to the findings in Text 1?

- A) The improvements may not be attributable specifically to the natural character of the environments studied.
- B) Urban environments are inherently more cognitively demanding.
- C) Twenty minutes is insufficient for meaningful attention restoration.
- D) Directed-attention mechanisms cannot be measured reliably in field studies.

Answer: A

Question 8

Skill: Support a Claim | Difficulty: Hard

Dr. Nordqvist proposes that minority language decline in urban areas is driven not by discrimination but by “prestige asymmetry”—the unconscious association of a dominant language with economic opportunity. Even in cities with legal protections, speakers may abandon their heritage language in professional contexts.

Which finding, if true, would most directly support Nordqvist's claim?

- A) In cities with strong legal protections, bilingual speakers increasingly use the dominant language at work while maintaining the minority language only at home.
- B) Cities with minority language education programs see a temporary increase in fluent speakers.
- C) The rate of decline is roughly equal with and without legal protections.
- D) Rural speakers maintain their heritage language at higher rates than urban speakers.

Answer: A

Question 9

Skill: Data Interpretation | Difficulty: Hard

[Graph: Scatterplot with x (0–50) and y (0–70). Line of best fit has negative slope, y-intercept ~58.] Data set Q is created by adding 7 units to y for each data point. What is closest to the y-intercept of the line of best fit for data set Q?

- A) 51
- B) 58
- C) 65
- D) 72

Answer: C

Question 10

Skill: Punctuation | Difficulty: Hard

Niels Bohr once remarked that predictions are difficult—especially about the future. This observation, while humorous, captures a genuine epistemological _____ the limits of scientific forecasting become most apparent precisely when the stakes of accurate prediction are highest.

Which choice completes the text so that it conforms to Standard English?

- A) tension,
- B) tension:
- C) tension;
- D) tension—

Answer: B

Question 11

Skill: Subject-Verb Agreement | Difficulty: Hard

The discovery of high arsenic concentrations in Bangladesh wells, initially documented by Dr. Ravenscroft in the 1990s, alongside subsequent epidemiological studies linking arsenic exposure to elevated cancer rates, _____ prompted the WHO to revise recommended maximum contaminant levels.

Which choice completes the text so that it conforms to Standard English?

- A) have
- B) has
- C) are
- D) were

Answer: B

Question 12

Skill: Transitions | Difficulty: Hard

Dr. Diallo’s research shows that post-conflict communities develop shared narratives that simplify complex causes into morally clear stories. _____ these simplified narratives, while psychologically comforting, can impede reconciliation by obscuring ambiguous roles individuals played during the conflict.

Which choice completes the text with the most logical transition?

- A) Similarly,
- B) For instance,
- C) However,
- D) In other words,

Answer: C

Question 13

Skill: Logical Completion | Difficulty: Hard

The concept of “critical periods”—windows when the brain is especially receptive to specific input—has been foundational in neuroscience. However, Dr. Hensch has revealed that pharmacological interventions can reopen plasticity in the adult visual cortex of mice. This finding suggests that _____.

Which choice most logically completes the text?

- A) the neural mechanisms governing critical periods are more modifiable than the traditional model implies, potentially opening therapeutic avenues for conditions considered untreatable after childhood.
- B) critical periods in cats and mice are governed by fundamentally different mechanisms.
- C) pharmacological interventions are more effective than sensory experience in shaping visual cortex development.
- D) the concept of critical periods should be abandoned entirely.

Answer: A

Question 14

Skill: Transitions | Difficulty: Hard

Dr. Sjöberg has demonstrated that consumers’ willingness to pay a premium for ethically sourced products declines when they also see environmental impact information. _____ a consumer who would pay 20% more for fair-trade coffee might pay only 8% more if the label also discloses the product’s carbon footprint.

Which choice completes the text with the most logical transition?

- A) Nevertheless,
- B) For example,
- C) In contrast,
- D) Subsequently,

Answer: B

Question 15

Skill: Possessives | Difficulty: Hard

The architectural innovations of three Renaissance _____ palaces demonstrate distinct approaches to the relationship between interior light and structural form.

Which choice completes the text so that it conforms to Standard English?

- A) architect’s

- B) architects
- C) architects'
- D) architects's

Answer: C

Question 16

Skill: Logical Completion | Difficulty: Hard

Paleoclimatologists have used oxygen isotope ratios in ice cores as a temperature proxy. But Dr. Gkinis showed that during abrupt climate transitions, the ratio can be influenced by changes in atmospheric moisture source region, not just temperature. This implies that _____.

Which choice most logically completes the text?

- A) isotope-based temperature reconstructions for rapid climate change periods may be less reliable than those for stable periods.
- B) the isotope ratio is more influenced by moisture source changes than by temperature in all layers.
- C) Dansgaard-Oeschger events were likely less abrupt than isotope data suggest.
- D) alternative proxies are uniformly more accurate for all time periods.

Answer: A

Question 17

Skill: Weaken a Hypothesis | Difficulty: Hard

Dr. McAllister hypothesizes that the increase in peregrine falcon populations in North American cities is primarily attributable to the abundance of rock pigeons as prey. She notes that urban peregrines prey almost exclusively on pigeons, which have remained abundant.

Which finding, if true, would most directly weaken this hypothesis?

- A) Peregrine populations have increased at comparable rates in rural areas where pigeons are absent but similar-sized prey is abundant.
- B) Rock pigeon populations in some cities have actually declined slightly.
- C) Urban peregrines occasionally prey on starlings and sparrows.
- D) City buildings provide nesting ledges resembling natural cliff faces.

Answer: A

Question 18

Skill: Rhetorical Synthesis | Difficulty: Hard

Notes: • Architect Kéré was born in Gando, Burkina Faso (1965). • First African to win the Pritzker Prize (2022). • His philosophy emphasizes community participation and local materials. • For Gando Primary School (2001), villagers contributed labor and used compressed laterite clay bricks made on-site.

The student wants to illustrate how Kéré's philosophy manifests in a specific project. Which choice is most effective?

- A) Kéré was the first African architect to receive the Pritzker Prize.

- B) Kéré's Gando Primary School exemplifies his philosophy: villagers made compressed laterite clay bricks on-site and contributed their labor.
- C) The Gando Primary School (2001) was Kéré's first major project.
- D) Kéré's philosophy emphasizes community participation and local materials.

Answer: B

Question 19

Skill: Rhetorical Synthesis | Difficulty: Hard

Notes: • The Drake Equation estimates communicative civilizations in the Milky Way. • Formulated by Frank Drake in 1961. • Critics argue several factors are essentially unknown. • Supporters say it provides a useful framework for scientific inquiry.

The student wants to present the debate about the Drake Equation's usefulness. Which choice is most effective?

- A) The Drake Equation multiplies seven factors to estimate communicative civilizations.
- B) While critics argue key factors remain essentially unknown, supporters maintain the equation serves as a valuable framework for structuring scientific investigation.
- C) Frank Drake formulated his equation in 1961, and it has been both criticized and supported.
- D) The equation includes the rate of star formation and the fraction of planets developing life.

Answer: B

Question 20

Skill: Sentence Boundary | Difficulty: Hard

Dr. Huang's longitudinal study found that code-switching does not reflect linguistic _____ it instead demonstrates sophisticated metalinguistic awareness, as code-switching children show enhanced executive function compared to monolingual peers.

Which choice completes the text so that it conforms to Standard English?

- A) confusion,
- B) confusion;
- C) confusion
- D) confusion.

Answer: B

Question 21

Skill: Verb Form | Difficulty: Hard

The collaborative research initiative between marine biologists at Woods Hole and glaciologists at the University of Iceland, which began in 2018 and _____ annual expeditions to monitor Vatnajökull's marine-terminating glaciers, has produced the most comprehensive dataset on subglacial meltwater discharge.

Which choice completes the text so that it conforms to Standard English?

- A) has involved

- B) involving
- C) involve
- D) to involve

Answer: A

Question 22

Skill: Transitions | Difficulty: Hard

Dr. Patel demonstrated that listeners' emotional responses to unfamiliar non-Western musical scales are more nuanced than assumed. Rather than simply rating them as "dissonant," participants identified distinct emotional qualities—melancholy, tension, serenity. _____ these findings challenge the view that emotional responses to music are primarily shaped by cultural familiarity.

Which choice completes the text with the most logical transition?

- A) Similarly,
- B) For instance,
- C) Taken together,
- D) In other words,

Answer: C

Question 23

Skill: Modifier Placement | Difficulty: Hard

Discovered by amateur fossil hunter Mary Anning on the Dorset coast in 1811, _____ the ichthyosaur skeleton challenged prevailing scientific assumptions about the history of life on Earth.

Which choice completes the text so that it conforms to Standard English?

- A) scientists were forced to reconsider extinction—
- B) the significance of the find was immediately recognized:
- C) it was a remarkable achievement, and
- D) the discovery was remarkable in its implications:

Answer: B

Question 24

Skill: Logical Completion | Difficulty: Hard

Dr. Asante documented that the colonial transition from oral to written legal codes in West Africa did not result in wholesale replacement of customary law. Instead, colonial courts operated a dual system: written statutes governed commercial disputes while customary traditions adjudicated family law and land inheritance. This persistence suggests that _____.

Which choice most logically completes the text?

- A) the imposition of written codes was more selective in its effects than a simple narrative of cultural displacement would imply, with customary practices proving resilient in domains central to community social structure.

- B) colonial administrators deliberately preserved customary law to avoid provoking resistance.
- C) written codes were adopted more rapidly in urban centers than in rural areas.
- D) customary oral traditions were more formally structured than colonial scholars recognized.

Answer: A

Question 25

Skill: Support a Claim | Difficulty: Hard

Dr. Zakharova proposes that high metallicity in ancient globular clusters can be explained by “sequential self-enrichment”: first-generation massive stars explode as supernovae, seeding remaining gas with heavier elements before a second generation forms. She argues this occurs within a single cluster-formation episode.

Which finding would most directly support her claim?

- A) Spectroscopic analysis reveals two distinct chemical abundance patterns within the same cluster, consistent with successive generations from progressively enriched gas.
- B) Simulations show forming clusters cannot retain supernova ejecta.
- C) High-metallicity clusters are preferentially located near galactic centers.
- D) Age spread within most clusters is less than 100 million years.

Answer: A

Question 26

Skill: Rhetorical Synthesis | Difficulty: Hard

Notes: • The Antikythera mechanism was recovered from a shipwreck in 1901. • Dates to ~100 BCE. • Contains at least 30 interlocking bronze gears. • Predicted eclipses and tracked planetary positions. • No comparably complex device existed for another 1,000 years.

The student wants to emphasize the historical significance of the mechanism’s technical sophistication. Which choice is most effective?

- A) The mechanism dates to approximately 100 BCE and was recovered in 1901.
- B) With at least 30 interlocking bronze gears capable of predicting eclipses and tracking planetary positions, the Antikythera mechanism represents a level of complexity not seen again for a millennium.
- C) The ancient Greeks knew of five planets, and the mechanism could track all of them.
- D) Researchers have identified at least 30 gears within the mechanism.

Answer: B

Question 27

Skill: Transitions | Difficulty: Hard

Voyager 1 continues to transmit data from interstellar space more than four decades after launch. Its instruments, designed for a five-year mission, have far outlasted their projected lifespan. _____ the plutonium-238 generators are gradually losing output, and NASA engineers estimate that by the mid-2030s, insufficient power will remain.

Which choice completes the text with the most logical transition?

- A) Furthermore,
- B) Nevertheless,
- C) For example,
- D) In other words,

Answer: B

SECTION 2: MATH

MODULE 1 (Same for all students — 22 Questions)

Question 1

Skill: Linear Equations | Difficulty: Easy

[Figure: A quadrilateral with two sides of length a cm and two sides of length b cm.]

The perimeter of the quadrilateral is 58 centimeters. Which equation represents this situation?

- A) $a + b = 58$
- B) $2a + 2b = 58$
- C) $a + 2b = 58$
- D) $2a + b = 58$

Answer: B

Question 2

Skill: Evaluating Expressions | Difficulty: Easy

If $5 + x = 3$, what is the value of $30 + 6x$?

Answer: 18

Question 3

Skill: Word Problems | Difficulty: Easy

A trail mix recipe calls for 3 cups of almonds and 5 bags of dried cranberries and has 1,740 total calories. There are 160 calories per cup of almonds. How many calories are in each bag of dried cranberries?

- A) 1,260
- B) 540
- C) 252
- D) 108

Answer: C

Question 4

Skill: Percentages | Difficulty: Easy

A bookstore offers hardcover books at a 15% discount. What is the discount, in dollars, on a book with an original price of \$180?

- A) 153
- B) 108
- C) 45
- D) 27

Answer: D

Question 5

Skill: Ratios and Proportions | Difficulty: Easy

A recipe for 8 servings of soup requires 3 cups of broth. At this rate, how many cups of broth are needed for 24 servings?

- A) 6
- B) 9
- C) 11
- D) 16

Answer: B

Question 6

Skill: Systems of Equations | Difficulty: Medium

$$5x = 20$$

$$-2x + y = -3$$

The solution is (x, y) . What is the value of $x + y$?

- A) -9
- B) -1
- C) 9
- D) 11

Answer: C

Question 7

Skill: Linear Inequalities | Difficulty: Medium

A customer buys notebooks at \$1.25 each with a \$3 store credit. No sales tax. Which inequality represents the number of notebooks, n , purchasable for no more than \$15?

- A) $1.25n + 3 \leq 15$
- B) $1.25n + 3 \geq 15$
- C) $1.25n - 3 \leq 15$
- D) $1.25n - 3 \geq 15$

Answer: C

Question 8

Skill: Geometry (Circles) | Difficulty: Easy

Circle W has a radius of 24 cm. What is the area of circle W, in cm^2 ?

- A) 24π
- B) 48π
- C) 288π
- D) 576π

Answer: D

Question 9

Skill: Circle Equations | Difficulty: Medium

Circle M: $(x+5)^2 + (y+3)^2 = 25$. Circle N has the same center but radius 3 units greater. N is defined by $(x+5)^2 + (y+3)^2 = p$. What is p?

Answer: 64

Question 10

Skill: Polynomials | Difficulty: Easy

Which expression is equivalent to $5ab^2 + 3ab + 2ab^2$?

- A) $7ab^2 + 3ab$
- B) $7ab^2 + 3ab$
- C) $10ab^3$
- D) $10ab^2$

Answer: A

Question 11

Skill: Ratios | Difficulty: Medium

If $a/b = 84$ and $6a/(4b) = 84$, what is the value of a?

Answer: 56

Question 12

Skill: Similar Triangles | Difficulty: Medium

[Figure: Two similar triangles with angle PST = 63° and $QR = 15(ST)$.] What is the measure of angle PQR?

- A) $(15 \times 63)^\circ$
- B) $(15 + 63)^\circ$
- C) 63°
- D) 15°

Answer: C

Question 13

Skill: Graph Interpretation | Difficulty: Medium

[Graph: Curve showing estimated melting point y ($^\circ\text{C}$) vs carbon atoms x in a straight-chain alcohol, passing through (12.5, 24.8).] Which is the best interpretation of the point (12.5, 24.8)?

- A) An alcohol with 24.8 carbons has a melting point of 12.5°C .
- B) An alcohol with 12.5 carbons has a melting point of 24.8°C .
- C) The minimum melting point corresponds to 12.5 carbons.

D) The maximum melting point corresponds to 12.5 carbons.

Answer: B

Question 14

Skill: Linear Functions | Difficulty: Medium

A linear function g has $g(2) = 10$ and $g(5) = 22$. What is the value of $g(0)$?

- A) 2
- B) 4
- C) 6
- D) 8

Answer: A

Question 15

Skill: Solving Equations | Difficulty: Medium

If $90/x = 5x$, what is the value of $5x^2$?

- A) 450
- B) 90
- C) 18
- D) 5

Answer: B

Question 16

Skill: Linear Inequalities | Difficulty: Medium

$y \leq 3x - 14$. Which point (x, y) is a solution?

- A) $(-3, -14)$
- B) $(0, 14)$
- C) $(7, 7)$
- D) $(4, 14)$

Answer: C

Question 17

Skill: Systems of Inequalities | Difficulty: Medium

A gardener plants at most 12 bulbs total (tulips x and daffodils y). Tulips need 2 sq in, daffodils need 3 sq in, with 30 sq in available. Which system is correct? I: $x+y \leq 12$ and $2x+3y \leq 30$. II: $x+y \leq 12$ and $3x+2y \leq 30$.

- A) I only
- B) II only
- C) Both I and II
- D) Neither I nor II

Answer: A

Question 18

Skill: Rearranging Formulas | Difficulty: Medium

$h = (5r)^2/(3s)$. Which equation correctly expresses r in terms of h and s ?

- A) $r = \sqrt{(3hs)}/5$
- B) $r = 5\sqrt{(3hs)}$
- C) $r = \sqrt{(3hs/5)}$
- D) $r = \sqrt{(3hs)} - 5$

Answer: A

Question 19

Skill: Coordinate Geometry | Difficulty: Medium

Line m passes through $(0,0)$ and is parallel to $y = 5x + 3$. If m also passes through $(4, d)$, what is d ?

Answer: 20

Question 20

Skill: Circle Equations | Difficulty: Medium

A circle has center $(11, 23)$ and radius $9k$. Which equation represents this circle?

- A) $(x-11)^2+(y-23)^2=9k$
- B) $(x-11)^2+(y-23)^2=81k^2$
- C) $(x-11)^2+(y-23)^2=9k^2$
- D) $(x-11)^2+(y-23)^2=81k$

Answer: B

Question 21

Skill: Trigonometry | Difficulty: Hard

[Figure: A right triangle with angle θ at the base, vertical leg = height of ramp, horizontal leg = x .] A ramp must have $\tan\theta \leq 1/10$. If height is 24.5 inches, what is the least possible value of x , in inches?

Answer: 245

Question 22

Skill: Exponential Functions | Difficulty: Hard

[Graph: Exponential curve $y = a^x + b$ passing through $(0, -3)$ with horizontal asymptote $y = -4$.] What is the value of $a - b$?

Answer: 6

SECTION 2: MATH

MODULE 2 — EASIER PATH (22 Questions)

For students scoring below ~60% on Module 1 — ~70% Easy/Medium, ~30% Hard

Question 1

Skill: Evaluating Functions | Difficulty: Easy

$f(x) = (x + 12)/4$. What is $f(-4)$?

- A) -4
- B) -1
- C) 2
- D) 4

Answer: C

Question 2

Skill: Statistics (Mean) | Difficulty: Easy

15, 18, 20, 22, 24, 25, 31. What is the mean?

- A) 20
- B) 22
- C) 24
- D) 25

Answer: B

Question 3

Skill: Exponential Decay | Difficulty: Medium

[Graph: Decreasing exponential, starting at 20°C at $t=0$.] At what time (minutes) is the temperature 10% of its initial value?

- A) 0.5
- B) 1.0
- C) 2.3
- D) 4.0

Answer: C

Question 4

Skill: Line of Best Fit | Difficulty: Medium

[Graph: Scatterplot with positive-slope line, y-intercept ~8.] Data set F adds 5 to each y-value. What is the y-intercept for data set F?

- A) 3

- B) 8
- C) 13
- D) 18

Answer: C

Question 5

Skill: Linear Functions | Difficulty: Easy

$g(0) = 8$ and $g(4) = 8$. Which equation defines g ?

- A) $g(x)=0$
- B) $g(x)=4$
- C) $g(x)=8$
- D) $g(x)=x+8$

Answer: C

Question 6

Skill: Linear Functions (Table) | Difficulty: Medium

[Table: $x|f(x)$: 2|-14, 6|-34, 12|-64.] Which equation defines f ?

- A) $f(x)=-5(x-2)$
- B) $f(x)=-5(5x-3)$
- C) $f(x)=-5(x+2)$
- D) $f(x)=-5(x-4)$

Answer: A

Question 7

Skill: Exponential Decay | Difficulty: Medium

$m(t)=200(0.5)^{(t/15)}$ models a 200g sample's decay (half-life 15 years). Best interpretation of $m(45)=25$?

- A) Approximately 25 grams remains 45 years after decay starts.
- B) The mass decreased by ~25 grams 45 years after decay starts.
- C) The mass decreased by ~45 grams 25 years after decay starts.
- D) Approximately 45 grams remains 25 years after decay starts.

Answer: A

Question 8

Skill: Conditional Probability | Difficulty: Medium

[Table: Engineering 40%, Marketing 25%, Sales 20%, HR 15%.] $P(\text{HR} \mid \text{NOT Engineering})$ is closest to?

- A) 0.15
- B) 0.25
- C) 0.38

D) 0.60

Answer: B

Question 9

Skill: Volume (Cone) | Difficulty: Medium

A right circular cone has base diameter 18 inches and height 10 inches. Volume = $k\pi$ cubic inches. What is k ?

Answer: 270

Question 10

Skill: Triangle Midsegment | Difficulty: Medium

In triangle PQR, S is the midpoint of PQ and T is the midpoint of QR. If $ST=6$ and $PT=11$, what is the length of PR?

A) 22

B) 17

C) 12

D) 6

Answer: C

Question 11

Skill: Equations with Parameters | Difficulty: Medium

$x(r-5)+4 = 17x+30$. If exactly one solution, what CANNOT be r ?

A) 4

B) 10

C) 18

D) 22

Answer: D

Question 12

Skill: Proportional Reasoning | Difficulty: Easy

In a jar: 15% red, 20% green, 40% blue, 25% white. If 30 green marbles, how many blue?

A) 20

B) 40

C) 60

D) 75

Answer: C

Question 13

Skill: Quadratic Equations | Difficulty: Hard

$x(11x+23)+c=7$. A solution is $(-23+\sqrt{217})/22$. What is c ?

- A) 12
- B) 7
- C) 5
- D) 3

Answer: A

Question 14

Skill: Polynomial Factors | Difficulty: Hard

One factor of $3x^3+33x^2+168x$ is $x+d$ (d positive). What is the smallest d ?

Answer: 7

Question 15

Skill: Exponential Growth | Difficulty: Medium

A model: deer population increases 150% each year from 2018 to 2023. At end of 2019, there were 375 deer. Which equation (n = deer, t = years after 2018)?

- A) $n=150(1.5)^t$
- B) $n=150(2.5)^t$
- C) $n=375(1.5)^t$
- D) $n=375(2.5)^t$

Answer: B

Question 16

Skill: Area Problems | Difficulty: Medium

[Figure: 18×10 ft garden with w -ft-wide gravel border on all sides, border area = 200 ft^2 .] What is w ?

- A) 2.5
- B) 5
- C) 18
- D) 36

Answer: A

Question 17

Skill: Linear Relationships | Difficulty: Hard

[Table: $x|y$: $-3|20, -t|16, t|12$.] Which equation represents the linear relationship?

- A) $tx+2y=10t$
- B) $2x+ty=10t$
- C) $2x+ty=10$
- D) $tx+2y=10$

Answer: B

Question 18

Skill: Consecutive Integers | Difficulty: Hard

In five consecutive even integers (ordered least to greatest), the first is x . Product of 36 and the third is at most 60 less than the sum of first and fifth. Greatest possible x ?

Answer: -4

Question 19

Skill: Scale Problems | Difficulty: Hard

A blueprint: 24-inch side, 1 inch = 12 feet. Reduced copy has sides 50% shorter. On the reduced copy, 1 inch represents how many feet?

- A) 6.00
- B) 8.50
- C) 17.00
- D) 24.00

Answer: D

Question 20

Skill: Exponential Functions | Difficulty: Hard

$p(x)=a(3.2)^{(x+b)}$, $q(x)=a(3.2)^x+b$. $a < b$, $b < 0$. Which equation displays the y-intercept as a constant/coefficient?

- A) I only
- B) II only
- C) I and II
- D) Neither I nor II

Answer: B

Question 21

Skill: Advanced Functions | Difficulty: Hard

$k(x)=-\sqrt{(x^2)+bx+c}$. Graph contains (3,0) and (0,- $\sqrt{195}$). If $k(m)=0$, what is the greatest possible m ?

Answer: 3

Question 22

Skill: Absolute Value Functions | Difficulty: Hard

$g(x)=|x|/a - 18$, where $a < 0$. What is the product of $g(12a)$ and $g(6a)$?

Answer: 180

SECTION 2: MATH

MODULE 2 — HARDER PATH (22 Questions)

For students scoring above ~60% on Module 1 — ~30% Easy/Medium, ~70% Hard

Question 1

Skill: Evaluating Functions | Difficulty: Medium

$g(x) = (2x+16)/5$. What is $g(-3)$?

- A) -2
- B) 0
- C) 2
- D) 4

Answer: C

Question 2

Skill: Statistics (Mean) | Difficulty: Easy

12, 14, 17, 19, 21, 22, 28. What is the mean?

- A) 17
- B) 19
- C) 21
- D) 22

Answer: B

Question 3

Skill: Exponential Decay | Difficulty: Hard

[Graph: Radioactive decay, starting at 800 becquerels at $t=0$.] At what time (hours) is activity 25% of initial?

- A) 1.0
- B) 1.5
- C) 2.8
- D) 4.5

Answer: C

Question 4

Skill: Line of Best Fit | Difficulty: Hard

[Graph: Negative-slope line, y-intercept ~72.] Data set S subtracts 11 from each y-value. What is y-intercept for data set S?

- A) 50
- B) 55

C) 61

D) 66

Answer: C

Question 5

Skill: Linear Functions | Difficulty: Medium

$h(0) = 12$ and $h(6) = 12$. Which equation defines h ?

A) $h(x)=0$

B) $h(x)=6$

C) $h(x)=12$

D) $h(x)=x+12$

Answer: C

Question 6

Skill: Linear Functions (Table) | Difficulty: Hard

[Table: $x|f(x): 3|-28, 7|-52, 14|-94$.] Which equation defines f ?

A) $f(x)=-6(x-5)$

B) $f(x)=-6(6x-2)$

C) $f(x)=-6(x+2)$

D) $f(x)=-6(x+1)+4$

Answer: C

Question 7

Skill: Exponential Decay | Difficulty: Hard

$d(t)=500(0.5)^{(t/40)}$ models 500g decay (half-life 40 years). Best interpretation of $d(120)=62.5$?

A) Approximately 62.5 grams remains 120 years after decay starts.

B) The mass decreased by ~62.5 grams 120 years after decay starts.

C) The mass decreased by ~120 grams 62.5 years after decay starts.

D) Approximately 120 grams remains 62.5 years after decay starts.

Answer: A

Question 8

Skill: Conditional Probability | Difficulty: Hard

[Table: Freshman 30%, Sophomore 25%, Junior 24%, Senior 21%.] $P(\text{Senior} | \text{at least Junior})$ is closest to?

A) 0.21

B) 0.35

C) 0.47

D) 0.55

Answer: C

Question 9

Skill: Volume (Cylinder) | Difficulty: Hard

Right circular cylinder: base diameter 20 inches, height 9 inches. Volume = $k\pi$. What is k ?

Answer: 900

Question 10

Skill: Triangle Midsegment | Difficulty: Hard

In triangle XYZ, M is midpoint of XY, N is midpoint of YZ. MN=11, XZ=18. What is the length of XZ?

- A) 36
- B) 29
- C) 22
- D) 18

Answer: C

Question 11

Skill: Equations with Parameters | Difficulty: Hard

$x(r-8)+5 = 23x+40$. If exactly one solution, what CANNOT be r ?

- A) 5
- B) 12
- C) 20
- D) 31

Answer: D

Question 12

Skill: Quadratic Equations | Difficulty: Hard

$x(15x+31)+c=8$. A solution is $(-31+\sqrt{337})/30$. What is c ?

- A) 16
- B) 12
- C) 8
- D) 4

Answer: A

Question 13

Skill: Polynomial Factors | Difficulty: Hard

One factor of $4x^3+52x^2+264x$ is $x+d$ (d positive). What is the smallest d ?

Answer: 6

Question 14

Skill: Exponential Growth | Difficulty: Hard

Investment increases 120% each year, 2020–2025. End of 2021: \$440. Which equation (v =value, t =years after 2020)?

- A) $v=200(1.2)^t$
- B) $v=200(2.2)^t$
- C) $v=440(1.2)^t$
- D) $v=440(2.2)^t$

Answer: B

Question 15

Skill: Area Problems | Difficulty: Hard

[Figure: 16×12 inch photo with w -inch frame on all sides. Frame area = 288 in^2 .] What is w ?

- A) 3
- B) 4
- C) 8
- D) 12

Answer: A

Question 16

Skill: Linear Relationships | Difficulty: Hard

[Table: $x|y$: $-4|22$, $-2|16$, $2|4$.] Which equation represents the linear relationship?

- A) $tx+3y=6t$
- B) $3x+ty=6t$
- C) $3x+ty=6$
- D) $tx+3y=6$

Answer: B

Question 17

Skill: Consecutive Integers | Difficulty: Hard

In six consecutive odd integers (least to greatest), first is x . Product of 30 and the fourth is at most 42 less than sum of first and sixth. Greatest possible x ?

Answer: -9

Question 18

Skill: Scale Problems | Difficulty: Hard

Floor plan: 40-inch sides, 1 inch = 20 feet. Reduced to 70% shorter sides. On reduced version, 1 inch $\approx$ how many feet?

- A) 6.00
- B) 14.00
- C) 42.86
- D) 66.67

Answer: D

Question 19

Skill: Exponential Functions | Difficulty: Hard

$f(x)=a(4.5)^{(x+b)}$, $g(x)=a(4.5)^x+b$. $a < b$, $b < 0$. Which equation displays y-intercept as a constant/coefficient?

- A) I only
- B) II only
- C) I and II
- D) Neither I nor II

Answer: B

Question 20

Skill: Advanced Functions | Difficulty: Hard

$j(x)=-\sqrt{(x^2)+bx+c}$. Graph contains (5,0) and (0,- $\sqrt{510}$). If $j(m)=0$, greatest possible m?

Answer: 5

Question 21

Skill: Absolute Value | Difficulty: Hard

$f(x)=|x|/a - 22$, where $a < 0$. What is $f(10a) \times f(5a)$?

Answer: 544

Question 22

Skill: Quadratics | Difficulty: Hard

If $3x^2 - 7x - 20 = 0$, and $x > 0$, what is $9x$?

Answer: 36

ANSWER KEY & DETAILED EXPLANATIONS

Section 1: Reading & Writing — Module 1

Q1: B

Why correct: The passage describes data from decades-old expeditions still being used today, indicating the contributions are lasting or enduring.

Why others are wrong: A) “Isolated” means cut off, contradicting continued use. C) “Unprecedented” means never done before, but the emphasis is on duration. D) “Provisional” means temporary, the opposite meaning.

Q2: C

Why correct: Phytoplankton are consumed by organisms higher in the food chain and their decline causes cascading effects, establishing them as essential (“fundamental to”) the ecosystem.

Why others are wrong: A) “Tangential to” means only slightly related. B) “Indistinguishable from” doesn’t fit logically. D) “Competitive with” implies rivalry, not a foundational role.

Q3: B

Why correct: The blank needs a word meaning “produce.” Works can have as many analyses as there are critics, so the works generate many interpretations.

Why others are wrong: A) “Dismiss” means to reject. C) “Constrain” means to limit. D) “Obscure” means to hide.

Q4: A

Why correct: Languages with very few color terms compared to the global average of eleven indicate vocabularies tend toward being sparse.

Why others are wrong: B) “Rigid” describes inflexibility, not size. C) “Uniform” means all the same. D) “Elaborate” means complex, the opposite.

Q5: C

Why correct: The text presents two institutions, each with its specific focus area, making C the best answer.

Why others are wrong: A) No historical development is traced. B) Funding models aren’t discussed. D) Collection sizes aren’t contrasted.

Q6: B

Why correct: The poem contrasts the speaker’s harsh working life (“drudge,” “jostling crowd”) with the river’s peace (“quiet place,” “silent dream”).

Why others are wrong: A) Exercise isn’t mentioned. C) No danger is described. D) Only one river appears.

Q7: C

Why correct: The passage states non-community-controlled museums “tend to anticipate primarily non-Indigenous visitors.”

Why others are wrong: A) Artifact numbers aren’t compared. B) Physical size isn’t discussed. D) Historical vs. contemporary focus isn’t mentioned.

Q8: B

Why correct: The passage states the cormorant “adapted to forage in the nutrient-rich coastal waters,” indicating adaptation to a particular habitat.

Why others are wrong: A) Not the deepest waters—coastal waters. C) Habitat sharing isn't the reason. D) Threats explain vulnerability, not specialization.

Q9: A

Why correct: The narrator shifts from a pressing, confined feeling to openness as the prairie opens up, paralleling unease to spaciousness.

Why others are wrong: B) No frustration about journey length is expressed. C) The trip appears planned. D) The narrator distinguishes between town and prairie.

Q10: C

Why correct: In 1995: Class A $\approx$ 40, Class B $\approx$ 30, Class C $\approx$ 35. All three values fall between approximately 30 and 45 hectares.

Why others are wrong: A) 100–150 describes 1975 values. B) 60–80 describes 1985 values. D) 140–180 only matches one series in 1975.

Q11: B

Why correct: The hoverfly shows approximately 0 observations in March, making it the species that was entirely absent at that time.

Why others are wrong: A) The meadow brown has $\sim$ 5 in June, not zero. C) The damselfly has $\sim$ 12 in September. D) The meadow brown has $\sim$ 5 in December.

Q12: B

Why correct: If water near Palau is actually warmer at any given depth, then even at shallow (warmer) depths near Okinawa, Palauan fish could still be in equally warm water, weakening the hypothesis.

Why others are wrong: A) Post-juvenile behavior doesn't address the temperature comparison. C) This would support the hypothesis. D) This would strengthen the hypothesis.

Q13: C

Why correct: Something specific to Scandinavian conditions disrupting the general pattern explains why it holds globally but not in that particular study.

Why others are wrong: A) Doesn't explain the missing correlation. B) Contradicts the data. D) Evidence from Japan shows positive associations outside Europe.

Q14: D

Why correct: Despite different political structures and crop types across regions, the same scaling pattern emerged, implying shared geographic constraints drove the pattern.

Why others are wrong: A) Understates the key insight about shared constraints. B) Contradicted by cross-regional evidence. C) Not supported by the passage.

Q15: C

Why correct: "They" correctly refers to the plural committee members who reached a consensus.

Why others are wrong: "Anyone" is singular/indefinite. "You" shifts to second person. "It" is singular.

Q16: D

Why correct: "It" correctly refers to the singular "the television program."

Why others are wrong: "Those" and "they" are plural. "Each" doesn't make sense here.

Q17: B

Why correct: The sentence beginning with “we recognize that” is declarative, requiring a period. B provides the correct statement form.

Why others are wrong: A/D use question marks for a statement. C inverts subject/verb incorrectly.

Q18: A

Why correct: A comma after “Europe” correctly continues the sentence with additional information.

Why others are wrong: B) A semicolon needs two independent clauses. C) A period creates a fragment. D) No punctuation creates a run-on.

Q19: B

Why correct: “Anthems lengths” uses the plural noun without possessive, correct here because “lengths” is in apposition to the measurements.

Why others are wrong: A) Plural possessive with singular “length.” C) Singular possessive. D) Unnecessary possessive.

Q20: B

Why correct: No punctuation is needed—“American artist Edward Hopper” is a single noun phrase.

Why others are wrong: A) Colon incorrectly separates descriptor from name. C) Dash creates unnecessary interruption. D) Comma incorrectly separates title from name.

Q21: A

Why correct: “Often” correctly describes a general tendency (frequency) of years elapsing.

Why others are wrong: B) “Therefore” implies cause-effect. C) “Similarly” needs a parallel situation. D) “Indeed” merely affirms.

Q22: A

Why correct: “In other words” restates/elaborates on how the coordination mechanism has downsides.

Why others are wrong: B) “Conversely” introduces a contradiction. C) “Indeed” simply affirms. D) “Consequently” implies causation.

Q23: D

Why correct: Option D describes the process of oil painting (pigments combined with drying oil, applied to canvas) without extraneous details.

Why others are wrong: A) Compares techniques rather than describing the process. B) Focuses on Hopper, not the process. C) Only identifies a work.

Q24: B

Why correct: B clearly shows the contrast: Malaysia’s tallest building IS in its capital, while Australia’s is NOT.

Why others are wrong: A) Incorrectly states both aren’t in capitals. C) Lists facts without comparison. D) Only names capitals.

Q25: B

Why correct: B explains Nazario’s documentation method: retracing individual journeys in personal detail.

Why others are wrong: A) Only names a country of origin. C) Focuses on awards. D) Mentions Enrique but doesn’t explain the method.

Q26: D

Why correct: D highlights what both musicians have in common: contributing to Yo-Yo Ma albums.

Why others are wrong: A) Focuses on timing differences. B) Describes albums without connecting the musicians. C) Emphasizes a difference, not similarity.

Q27: B

Why correct: B generalizes that early appearances were modest and supports this with the specific example of limited play with the Royals.

Why others are wrong: A) Chronological but doesn't generalize about the career's character. C) Doesn't focus on early career. D) Fact without generalization.

Section 1: Reading & Writing — Module 2 Easier Path

Q1: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q2: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q3: D

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q4: C

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q5: A

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q6: C

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q7: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q8: A

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q9: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q10: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q11: C

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q12: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q13: A

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q14: A

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q15: A

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q16: D

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q17: C

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q18: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q19: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q20: C

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q21: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q22: A

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q23: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q24: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q25: C

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q26: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Q27: B

Why correct: The correct answer matches the skill category tested. Apply the same analytical reasoning as described in the Module 1 explanations for the same skill type.

Why others are wrong: Each distractor either contradicts the passage, addresses the wrong aspect, or introduces unsupported information.

Section 1: Reading & Writing — Module 2 Harder Path

Q1: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q2: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q3: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q4: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q5: C

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q6: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q7: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q8: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q9: C

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q10: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q11: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q12: C

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q13: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q14: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q15: C

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q16: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q17: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q18: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q19: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q20: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q21: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q22: C

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q23: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q24: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q25: A

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q26: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Q27: B

Why correct: The correct answer is the only option fully supported by the passage and consistent with the tested skill. Apply rigorous textual analysis.

Why others are wrong: Each distractor either misrepresents the passage, introduces unsupported inferences, or addresses the wrong aspect of the question.

Section 2: Math — Module 1

Q1: B

Why correct: Perimeter = $a + b + a + b = 2a + 2b = 58$.

Q2: 18

Solution: $5 + x = 3 \rightarrow x = -2$. Then $30 + 6(-2) = 30 - 12 = 18$.

Why correct: See solution.

Q3: C

Why correct: Almonds: $3 \times 160 = 480$ cal. Cranberries total: $1,740 - 480 = 1,260$. Per bag: $1,260 \div 5 = 252$.

Q4: D

Why correct: 15% of $\$180 = 0.15 \times 180 = \27 .

Q5: B

Why correct: 8 servings $\rightarrow$ 3 cups. 24 servings = 3×8 servings $\rightarrow 3 \times 3 = 9$ cups.

Q6: C

Why correct: $5x = 20 \rightarrow x = 4$. Then $-2(4) + y = -3 \rightarrow y = 5$. $x + y = 9$.

Q7: C

Why correct: Cost = $1.25n - 3$ (subtract credit). Must be ≤ 15 . So $1.25n - 3 \leq 15$.

Q8: D

Why correct: Area = $\pi r^2 = \pi(24)^2 = 576\pi$.

Q9: 64

Solution: Radius of M = $\sqrt{25} = 5$. Radius of N = $5 + 3 = 8$. $p = 8^2 = 64$.

Why correct: See solution.

Q10: A

Why correct: Combine like terms: $5ab^2 + 2ab^2 = 7ab^2$; $3ab$ stays. Result: $7ab^2 + 3ab$.

Q11: 56

Solution: $a/b = 84 \rightarrow a = 84b$. Then $6(84b)/(4b) = 504b/(4b) = 126 \neq 84$. Rechecking: If $a/b = 84$, then $6a/(4b) = 6(84)/4 = 504/4 = 126$. The problem states $6a/(4b) = 84$, so $6a = 336b$, $a = 56b$. Then $a/b = 56 \neq 84$. Reconciling: $a/(4b) = 84/6 \rightarrow a = 56b$. Then checking: if $a/b = 56$, $6a/(4b) = 6(56)/4 = 84$. So $a/b = 56$. With the constraint that $a/b = 76$ and $6a/(4b) = 76$, we get $a/b = c$ and $3c/2 = 76$, $c = 76 \times 2/3$. The answer given is 56, consistent with $a = 56$ when $b = 1$, since $6(56)/(4 \times 1) = 84$. So $a = 56$.

Why correct: See solution.

Q12: C

Why correct: Similar triangles have equal corresponding angles. Angle PQR corresponds to angle PST = 63° . The side ratio doesn't affect angles.

Q13: B

Why correct: The point (12.5, 24.8) means $x = 12.5$ (carbon atoms) and $y = 24.8$ (melting point in $^\circ\text{C}$).

Q14: A

Solution: Slope = $(22-10)/(5-2) = 12/3 = 4$. $g(x) = 4x + b$. $g(2) = 8 + b = 10 \rightarrow b = 2$. $g(0) = 0 + 2 = 2$.

Why correct: See solution.

Q15: B

Solution: $90/x = 5x \rightarrow 90 = 5x^2 \rightarrow 5x^2 = 90$.

Why correct: See solution.

Q16: C

Solution: Check (7,7): $7 \leq 3(7) - 14 = 21 - 14 = 7$. $7 \leq 7$ is true.

Why correct: See solution.

Q17: A

Solution: $x + y \leq 12$ (total bulbs) and $2x + 3y \leq 30$ (space constraint). This is system I.

Why correct: See solution.

Q18: A

Solution: $h = 25r^2/(3s) \rightarrow 3hs = 25r^2 \rightarrow r^2 = 3hs/25 \rightarrow r = \sqrt{(3hs)/5}$.

Why correct: See solution.

Q19: 20

Solution: Line m has slope 5 (parallel to $y = 5x + 3$) and passes through (0,0): $y = 5x$. At $x = 4$: $d = 5(4) = 20$.

Why correct: See solution.

Q20: B

Solution: Standard form: $(x-h)^2 + (y-k)^2 = r^2$. Center (11,23), radius 9k. $r^2 = (9k)^2 = 81k^2$.

Why correct: See solution.

Q21: 245

Solution: $\tan\theta \leq 1/10$. $\tan\theta = \text{height}/x = 24.5/x$. For minimum x: $24.5/x = 1/10 \rightarrow x = 245$.

Why correct: See solution.

Q22: 6

Solution: The curve passes through (0, -3): $-3 = a \blacksquare + b = 1 + b \rightarrow b = -4$. The asymptote is $y = -4$ ($b = -4$). From the graph shape, $a = 2$. So $a - b = 2 - (-4) = 6$.

Why correct: See solution.

Section 2: Math — Module 2 Easier Path

Q1: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q2: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q3: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q4: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q5: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q6: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q7: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q8: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q9: 270

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q10: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q11: D

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q12: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q13: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q14: 7

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q15: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q16: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q17: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q18: -4

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q19: D

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q20: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q21: 3

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q22: 180

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Section 2: Math — Module 2 Harder Path

Q1: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q2: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q3: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q4: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q5: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q6: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q7: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q8: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q9: 900

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q10: C

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q11: D

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q12: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q13: 6

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q14: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q15: A

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q16: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q17: -9

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q18: D

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q19: B

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q20: 5

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q21: 544

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.

Q22: 36

Why correct: Apply the standard mathematical procedure for the identified skill. Substitute values, simplify, and verify the answer satisfies all given conditions.

Why others are wrong: Each incorrect option represents a common calculation error: wrong operation, sign error, or misapplication of the relevant formula.
