

# SAT-Style Practice Test — December Original Practice Form

This practice test is written as a fresh SAT-style assessment with original passages, contexts, values, answer choices, and solutions. It is organized into the four Digital SAT sections requested.

## SECTION 1, MODULE 1: Reading and Writing

### Question 1

Skill: Words in Context

In her workshop, paper engineer Laila Nordin folds thin sheets into narrow ridges and then unfurls them into wide, fanlike sculptures. In the exhibition notes, the curator writes that Nordin's hands repeatedly 'fold' and 'unfurl' the paper, turning flat material into objects that seem to breathe.

As used in the text, what do the words 'fold' and 'unfurl' most nearly mean?

- A) Mark and erase
- B) Bend and open
- C) Copy and enlarge
- D) Hide and preserve

Answer: B

### Question 2

Skill: Words in Context

The red-tiled roofs and shaded courtyards of the early coastal colleges in California reveal the influence of Spanish colonial architecture. Designers of later campus buildings sometimes tried to \_\_\_\_\_ that style by adding stucco walls, arched walkways, and ornamental ironwork.

Which choice completes the text with the most logical and precise word or phrase?

- A) imitate
- B) postpone
- C) neglect
- D) contradict

Answer: A

### Question 3

Skill: Words in Context

In restoration ecology, the spread of invasive grasses can be difficult to \_\_\_\_\_ because their seeds remain viable for years and are easily carried by wind, shoes, and vehicles.

Which choice completes the text with the most logical and precise word or phrase?

- A) contain
- B) retrieve
- C) decorate
- D) pretend

Answer: A

### Question 4

Skill: Words in Context

Certain elements are almost always included in Gothic cathedrals, such as pointed arches and ribbed vaults. Because these features are so closely associated with the architectural style, they are often treated as its \_\_\_\_\_.

Which choice completes the text with the most logical and precise word or phrase?

- A) hallmarks
- B) rejections
- C) incentives
- D) duplicates

Answer: A

### Question 5

Skill: Text Structure and Purpose

Evolutionary biologist Rina Kapoor studies convergent evolution - a phenomenon that occurs when unrelated species independently develop similar traits. For example, the streamlined bodies of dolphins and tuna arose separately even though the animals belong to different groups. Kapoor argues that such similarities can reveal how environmental pressures shape organisms.

Which choice best states the function of the underlined portion in the text as a whole?

- A) It provides examples of researchers who studied a phenomenon in different fields.
- B) It gives a basic description of a phenomenon central to the discussion that follows.
- C) It describes a disagreement about whether a concept is useful in scientific research.
- D) It introduces a method of analysis discussed in greater detail later.

Answer: B

### Question 6

Skill: Text Structure and Purpose

In Yoruba, a West African language, repetition of a word or part of a word can create emphasis or alter meaning. Linguists call this process reduplication. In some cases, the repeated element adds intensity; in others, it signals plurality or a continuing action. Because the exact effect depends on context, translators must often consider the surrounding sentence before choosing an English equivalent.

Which choice best describes the overall structure of the text?

- A) It describes a linguistic phenomenon, gives examples of how it can function, and explains a challenge it presents.
- B) It compares two unrelated languages, states why one is easier to translate, and lists shared words.
- C) It argues that a language feature has become controversial and then offers evidence against that controversy.
- D) It identifies a historical cause of a language change and predicts future uses of that change.

Answer: A

### Question 7

Skill: Cross-Text Connections

Text 1

Geologists studying a circular depression beneath a shallow sea identified fractured rocks and a raised rim. They argue that these features are consistent with a meteorite impact and that the depression is therefore likely an ancient impact crater.

Text 2

Other researchers note that rapid withdrawal of underground magma can also produce circular depressions with raised edges. They do not reject the impact hypothesis, but they argue that the available evidence is not sufficient to rule out a volcanic origin.

Which choice best describes a difference between the approach of Text 1 and the approach of Text 2?

- A) Text 1 presents evidence for one explanation, whereas Text 2 evaluates an alternative explanation.
- B) Text 1 rejects all geological explanations, whereas Text 2 proposes a biological explanation.
- C) Text 1 focuses on how a discovery was funded, whereas Text 2 focuses on public reaction to it.
- D) Text 1 questions whether the site exists, whereas Text 2 describes its exact age.

Answer: A

### Question 8

Skill: Command of Evidence

The following text is adapted from a novel. When apprentice poet Tomas visits a famous writer, he brings his younger brother, Emil. Emil listens quietly while Tomas reads a new poem aloud. Afterward, Emil asks whether he may return the next day because he wants to hear what the writer's daughters think of the poem; he says that people who have grown up around books may notice strengths and weaknesses he cannot see.

Based on the text, why does Emil want to return the next day?

- A) He expects to receive formal lessons in poetry from the daughters.
- B) He hopes to ask the daughters for their responses to Tomas's poem.
- C) He wants to prove that Tomas has misunderstood the poem.
- D) He plans to teach the daughters a poem he has memorized.

Answer: B

### Question 9

Skill: Inference

Painter Noor Malik was known for completing street scenes rapidly, often producing several canvases in one afternoon. Some critics claimed this speed made the paintings careless. Yet museum conservators have noted that Malik's quick strokes were deliberate and that her strongest works use compressed detail to suggest crowded markets without depicting every object precisely.

What does the text most strongly suggest about Malik's paintings?

- A) Their rapid execution does not necessarily indicate a lack of artistic control.
- B) They were more realistic than any other paintings of crowded markets.
- C) They were valued only because they could be produced cheaply.
- D) Their subject matter was chosen mainly to attract wealthy buyers.

Answer: A

### Question 10

Skill: Central Ideas and Details

Several cities with many bicyclists have tried to increase cycling by adding protected bike lanes. Urban planner Marisol Vega cautions, however, that lane construction alone does not explain cycling rates: terrain, weather, public transit access, parking costs, and neighborhood density also influence whether people ride. Vega therefore treats bike lanes as one factor among many.

Based on the text, the author would most likely agree with which statement about protected bike lanes?

- A) They should be understood as one of several factors that can influence cycling in a city.
- B) They reduce cycling in cities where public transit is reliable.
- C) They affect cycling decisions less than neighborhood density does in every city.
- D) They are the only factor that consistently explains cycling rates.

Answer: A

### Question 11

Skill: Command of Evidence: Quantitative

[Table: Reports of damaging species affecting 22 historic wooden bridges. Country | Termites | Fungi | Beetles. Finland: 3 | 42 | 18. Norway: 9 | 21 | 25. Sweden: 14 | 39 | 11.]

A researcher concludes that, among the countries studied, Sweden reported the greatest number of termite species damaging the bridges, but Finland reported the greatest number of damaging fungal species.

Which choice best describes data from the table that support the researcher's conclusion?

- A) Sweden reported 14 termite species, more than Finland or Norway, while Finland reported 42 fungal species, more than Norway or Sweden.
- B) Norway reported 25 beetle species, which is more than either Finland or Sweden reported.
- C) Finland reported 3 termite species and 18 beetle species, both fewer than Sweden reported.
- D) Sweden and Norway reported more beetle species than fungal species.

Answer: A

### Question 12

Skill: Command of Evidence

A 1905 poetry collection by Amara Field includes poems in which the speaker links broad social concerns with everyday local scenes.

Which quotation from the collection most effectively illustrates the claim?

- A) "Let every lamp in every lane be trimmed against the night; / for hungry children pass below, unseen by palace light."
- B) "The moon above the cedar fence is polished, calm, and round; / it spills a silver quietness upon the sleeping ground."
- C) "I kept a ribbon in a drawer, blue as a summer stream; / it brought me back to childhood fields I visit now in dream."
- D) "No trumpet calls across the hill, no banners fill the square; / only the sparrows wake the town and scatter through the air."

Answer: A

### Question 13

Skill: Command of Evidence: Quantitative

[Graph: Orientation of paired leaves in three vine species. In cedar vine, about 125 pairs show opposite-side orientation and about 50 show same-side orientation. In frost vine, about 70 pairs show opposite-side orientation and about 0 show same-side orientation. In river vine, about 610 pairs show opposite-side orientation and about 180 show same-side orientation.]

Botanists observed that opposite-side orientation was more common than same-side orientation in each species. In cedar vine, for example, approximately \_\_\_\_\_

Which choice most effectively uses data from the graph to complete the example?

- A) 125 leaf pairs show opposite-side orientation, whereas approximately 50 pairs show same-side orientation.
- B) 50 leaf pairs show opposite-side orientation, whereas approximately 125 pairs show same-side orientation.
- C) 610 leaf pairs show opposite-side orientation, whereas no pairs show same-side orientation.
- D) 70 leaf pairs show same-side orientation, whereas approximately 0 pairs show opposite-side orientation.

Answer: A

### Question 14

Skill: Command of Evidence

Shrub heather and alpine willow grow in northern tundra, where warm autumn weather may delay the first hard freeze. Botanists hypothesize that such delays extend the growing season for both species, allowing them to produce more leaves before winter.

Which finding, if true, would most directly support the botanists' hypothesis?

- A) In years with late first freezes, both species produced more leaves overall than they did in years with earlier first freezes.

- B) Both species stopped producing leaves at the same time each year regardless of the first freeze date.
- C) Shrub heather produced fewer leaves in warm years, while alpine willow produced the same number each year.
- D) Neither species showed measurable variation in leaf production across the study period.

Answer: A

### Question 15

Skill: Information and Ideas: Logical Completion

In rural counties, researchers sometimes use snowball sampling: they first recruit a few participants and then ask those participants to identify other eligible people. Sociologist Dana Yi found that people recruited by acquaintances completed a yearlong survey at a higher rate than people recruited by strangers. Yi concluded that \_\_\_\_\_

Which choice most logically completes the text?

- A) being invited by someone with whom one has a social connection may increase participants' willingness to remain in a study.
- B) snowball sampling is never useful for locating people with rare characteristics.
- C) people with small social networks are always easier to recruit than people with large networks.
- D) all rural residents prefer to be contacted by researchers they have never met.

Answer: A

### Question 16

Skill: Standard English Conventions: Verb Tense

The textile wall hanging River Map is one of several works by artist Lina Ortiz currently on view at the city museum; the piece \_\_\_\_\_ in the museum's main gallery since March.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) has hung
- B) will hang
- C) hangs
- D) had hung

Answer: A

### Question 17

Skill: Standard English Conventions: Verb Form

The Achilles tendon, which attaches calf muscles to the heel bone, helps the foot \_\_\_\_\_ body weight during walking and running.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) bear
- B) bearing
- C) to bearing
- D) having borne

Answer: A

### Question 18

Skill: Standard English Conventions: Verb Form

In 1871, lawyer and editor Clara Ruiz became one of the first women in her province \_\_\_\_\_ a public office.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) to hold

- B) holding
- C) held
- D) having held

Answer: A

### **Question 19**

Skill: Standard English Conventions: Boundaries

The ancient bristlecone pine known as Star Peak is thousands of years old. With millions of data points stored in its annual growth \_\_\_\_\_ dendrochronologist Mira Chen can reconstruct regional climate patterns.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) rings,
- B) rings and
- C) rings, and
- D) rings; and

Answer: A

### **Question 20**

Skill: Standard English Conventions: Possessives

After researching pilot Bessie Coleman, a student wrote about two other Black aviators who later served in \_\_\_\_\_ aviation programs.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) the military's
- B) the militaries
- C) the militarys'
- D) the militarys

Answer: A

### **Question 21**

Skill: Transitions

Historian Mara Keene notes that pamphleteer Elias Ross used a classical pseudonym in several essays. \_\_\_\_\_ he also adopted formal sentence patterns associated with Roman speeches, a choice that made his political writing sound deliberately ancient.

Which choice completes the text with the most logical transition?

- A) Indeed,
- B) Conversely,
- C) Nevertheless,
- D) Meanwhile,

Answer: A

### **Question 22**

Skill: Transitions

In a travel memoir, the writer describes two branches of a river meeting after miles of separation. \_\_\_\_\_ she uses that image to reflect on how unrelated experiences can eventually join into one memory.

Which choice completes the text with the most logical transition?

- A) Similarly,
- B) Instead,
- C) For example,
- D) However,

Answer: A

### Question 23

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The island fox is a small mammal found on several Channel Islands.
- The Catalina quail is a bird found on the same islands.
- Both species have average adult weights below 3 kilograms.
- The student wants to emphasize a similarity between the two species.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Both the island fox and the Catalina quail are found on the Channel Islands and have adult weights below 3 kilograms.
- B) The island fox is a small mammal, whereas the Catalina quail is a bird.
- C) The Catalina quail can be found on islands where other bird species also live.
- D) Several Channel Island species are smaller than related mainland species.

Answer: A

### Question 24

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The Kiro scale ranks mineral hardness from 1 to 10.
- Minerals with higher Kiro numbers can scratch minerals with lower numbers.
- Zircon has a Kiro hardness of 7.5.
- Talc has a Kiro hardness of 1.
- The student wants to emphasize zircon's Kiro number.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) On the Kiro scale, zircon has a hardness of 7.5, meaning it can scratch minerals with lower numbers such as talc.
- B) Talc is one of the softest minerals on the Kiro scale.
- C) The Kiro scale orders minerals by their ability to scratch other minerals.
- D) Zircon and talc can both be ranked using the Kiro scale of mineral hardness.

Answer: A

### Question 25

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Writer Mina Patel's first published work of fiction was a short story.
- The story was titled "The Blue Window."
- It appeared in the magazine Harbor in 1934.
- The student wants to identify the title of Patel's first published work of fiction.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Mina Patel's first published work of fiction was a short story titled "The Blue Window."
- B) In 1934, a story by Mina Patel appeared in Harbor.
- C) Mina Patel was a writer whose fiction appeared in magazines.

D) "The Blue Window" was published in the magazine Harbor in 1934.

Answer: A

### Question 26

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Classical guitar has a left-hand technique called a barre.
- Flamenco guitar also uses a left-hand technique called a barre.
- In both techniques, one finger presses multiple strings at once.
- The student wants to emphasize a similarity between the two techniques.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) In both classical and flamenco guitar, a barre requires one finger to press multiple strings at once.
- B) Classical guitar and flamenco guitar are two traditions that use left-hand techniques.
- C) A barre is a guitar technique in which one finger presses strings.
- D) Flamenco guitar includes several techniques, including a barre.

Answer: A

### Question 27

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Light Spill is a 2017 glass sculpture by American artist Mara Chen.
- It is made from recycled windowpanes.
- Stained-glass windows were used in public buildings for centuries.
- Chen said the sculpture was meant to link contemporary recycling with older glass traditions.
- The student wants to connect the sculpture to the history of glass in art.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) With Light Spill, Chen links contemporary recycling to older glass traditions, including the centuries-long use of stained glass in public buildings.
- B) Light Spill is a 2017 sculpture made by American artist Mara Chen from recycled windowpanes.
- C) Because recycled windowpanes are inexpensive, artists such as Chen can create large glass sculptures.
- D) Stained-glass windows were common in public buildings long before Chen created Light Spill.

Answer: A

## SECTION 1, MODULE 2: Reading and Writing

### Question 1

Skill: Words in Context

The following text is adapted from a memoir. After twelve years away, Anil returns to his birthplace. At the station, his uncle searched the crowd, trying to find Anil among the passengers; because Anil had changed so much, his uncle walked past him twice.

As used in the text, what does the word 'find' most nearly mean?

- A) locate
- B) persuade
- C) judge
- D) create

Answer: A

### Question 2

Skill: Words in Context

Lessons from past droughts can help officials design policies for future water shortages. The factors that made some towns resilient a century ago may also be \_\_\_\_\_ communities facing water stress today.

Which choice completes the text with the most logical and precise word or phrase?

- A) applicable to
- B) concealed from
- C) integrated with
- D) dependent on

Answer: A

### Question 3

Skill: Words in Context

In a 2021 review, critics for the City Ledger praised Sofia Mensah's documentary and Arman Lee's drama, describing the former as 'sharply observed' and the latter as 'devastating and humane.'

Which choice completes the text with the most logical and precise word or phrase?

- A) commended
- B) overlooked
- C) satirized
- D) postponed

Answer: A

### Question 4

Skill: Central Ideas and Details

In 1880, botanist Helen Armitage buried 18 sealed jars containing soil and seeds from several plant species. Since then, researchers have retrieved one jar every few decades to test whether the seeds remain viable. Some species stopped germinating after 50 years, but seeds from one species retrieved in 2020 still sprouted.

Which choice best states the main purpose of the text?

- A) To discuss an ongoing experiment
- B) To explain how to remove certain plants

- C) To compare two unrelated seed collections
- D) To describe difficulties associated with naming plant species

Answer: A

### Question 5

Skill: Text Structure and Purpose

Textile artist Elena Vargas weaves portraits from strips of recycled fabric. Some works depict community leaders, while others portray anonymous workers waiting at bus stops. Vargas has said that both subjects matter to her because she wants viewers to recognize the dignity of public figures and ordinary people alike.

Which choice best describes the overall structure of the text?

- A) It provides details about Vargas's artworks, discusses specific examples of her subjects, and relates them to one of her artistic goals.
- B) It compares Vargas to several contemporary artists and then emphasizes her preference for collaboration.
- C) It explains how fabric has historically been used in art and then predicts future trends in weaving.
- D) It introduces Vargas's cultural background and describes how that background limits her subject matter.

Answer: A

### Question 6

Skill: Text Structure and Purpose

The following lines are from a poem by Ana Rios:

My days have grown too full for scattered talk;  
I keep my thoughts like seeds inside a jar,  
No longer giving every passerby  
A share of what I meant to plant myself.

Which choice best describes the function of the underlined portion in the text as a whole?

- A) It gives examples of behaviors the speaker is less inclined toward than she once was.
- B) It explains the speaker's method for growing actual seeds.
- C) It introduces a childhood memory the speaker remembers fondly.
- D) It emphasizes new social habits the speaker has eagerly developed.

Answer: A

### Question 7

Skill: Cross-Text Connections

Text 1

In 2018, the city of Valdivia was named a City of Rivers by an international cultural organization. Tourism officials argue that the honor increased interest in Valdivia's boat tours and riverfront restaurants.

Text 2

Some business owners in Valdivia expected tourism to increase after the designation, but researcher Lema Ortiz found that many potential visitors still did not know about the honor. Ortiz argues that cities must actively promote such designations to benefit fully from them.

Based on the texts, both authors would most likely agree with which statement?

- A) A city's local economy can benefit from an international designation, but that benefit may depend on public awareness.
- B) International designations never influence tourism.
- C) The designation harmed Valdivia's restaurants by reducing boat tours.
- D) Valdivia was chosen because it had no existing tourism industry.

Answer: A

### Question 8

Skill: Central Ideas and Details

Like several animals that live only on a single island chain, the silver-crowned rail has adapted to a narrow habitat: it nests in coastal reeds and feeds on one species of marsh snail. Because the rail is so specialized, it is especially vulnerable to habitat disturbance that reduces reed beds or snail populations.

Which choice best states the main idea of the text?

- A) The silver-crowned rail is a highly specialized island species and is therefore especially susceptible to habitat disturbance.
- B) Island birds always display the same feeding behaviors as mainland birds.
- C) The silver-crowned rail is related to several species that live in deserts.
- D) Coastal reeds are less important to the rail than marsh snails are.

Answer: A

### Question 9

Skill: Inference

In 2010, artist Jamal Osei created Desert Alphabet, a 90-meter-long arrangement of stones in a remote salt flat. The work belongs to the land art movement, in which artists often install large pieces outdoors, sometimes in locations that viewers may not expect to contain art.

Based on the text, what can be inferred about Desert Alphabet?

- A) Its location may be considered surprising.
- B) It was designed for display inside a commercial gallery.
- C) It marked the end of the land art movement.
- D) It was created early in Osei's career.

Answer: A

### Question 10

Skill: Command of Evidence: Quantitative

[Table: Early home video game systems. System | Manufacturer | Approximate units sold worldwide. VisionBox | TeraTech | 2,400,000. Pocket Play | Nendo | 17,900,000. HomeArcade | Milton | 3,200,000. Apple Fun | Appleton | 4,600,000.]

A student is surprised to find that the VisionBox sold relatively few units worldwide, with only about \_\_\_\_\_

Which choice most effectively uses data from the table to complete the statement?

- A) 2,400,000 units sold compared to approximately 17,900,000 units sold of the Pocket Play.
- B) 3,200,000 units sold compared to approximately 4,600,000 units sold of the Apple Fun.
- C) 17,900,000 units sold compared to approximately 2,400,000 units sold of the Pocket Play.
- D) 4,600,000 units sold compared to approximately 2,400,000 units sold of the HomeArcade.

Answer: A

### Question 11

Skill: Command of Evidence

A student studying three snake species assumed that the snakes do not detect sound traveling through the air, based on earlier studies showing responses to vibrations moving through the ground.

Which finding, if true, would most directly challenge the student's assumption?

- A) All three species moved more than 20 centimeters in response to airborne sound waves.
- B) Only one of the three species responded to vibrations traveling through the ground.
- C) One species has larger eyes than the other two species.

D) The snakes were less active at night than during the day.

Answer: A

### Question 12

Skill: Command of Evidence

In a short story, Mrs. Bell becomes absorbed in deciding how to spend a small inheritance.

Which quotation from the story most effectively illustrates the claim?

- A) "For an hour she listed prices on the back of an envelope, crossing out each plan only to begin a new one."
- B) "She shook the rain from her coat and laughed at the puddles gathering by the door."
- C) "The clerk asked whether she wanted the parcel wrapped in brown paper or blue."
- D) "A neighbor waved from the street, but Mrs. Bell did not recognize the scarf at first."

Answer: A

### Question 13

Skill: Command of Evidence: Quantitative

[Table: Average annual growth rates of agricultural exports before and after an FTA. Country | Exports to FTA partner before | Exports to FTA partner after | Total exports before | Total exports after. Lydora: 6.0 | 9.5 | 4.0 | 8.0. Marset: 12.0 | 28.0 | 18.0 | 5.0. Panova: -4.0 | -8.0 | 3.0 | 9.0. Torland: 8.0 | 6.0 | 7.0 | 5.0.]

Researchers note that an FTA can redirect exports from nonpartner countries toward the FTA partner.

Which choice most effectively uses data from the table to illustrate this point?

- A) Marset, because its export growth to the FTA partner increased after the FTA while its total export growth decreased.
- B) Lydora, because both its export growth to the FTA partner and total export growth increased after the FTA.
- C) Panova, because both its export growth to the FTA partner and total export growth decreased after the FTA.
- D) Torland, because both measures decreased after the FTA.

Answer: A

### Question 14

Skill: Information and Ideas: Logical Completion

Studies in several countries have found links between personality traits and preferences for musical styles. In a large cross-cultural study, researchers observed similar correlations across six continents, suggesting that \_\_\_\_\_

Which choice most logically completes the text?

- A) people with similar personality profiles may tend to prefer similar kinds of music across cultural contexts.
- B) musical preferences cannot be measured reliably outside one country.
- C) people are unable to develop preferences for music from unfamiliar cultures.
- D) personality traits are determined entirely by the music a person hears as a child.

Answer: A

### Question 15

Skill: Information and Ideas: Logical Completion

The oceanic whitetip shark and the Pacific halibut are ectothermic, meaning that their body temperatures are influenced by surrounding water. Although some regional endotherms can keep body temperatures above ambient conditions, models indicate that the body temperatures of ectothermic species usually fall as ambient water temperatures fall. This suggests that the body temperatures of \_\_\_\_\_

Which choice most logically completes the text?

- A) the oceanic whitetip shark and the Pacific halibut are at least partly determined by ambient water temperature.

- B) the oceanic whitetip shark remain fixed even when surrounding water temperatures change.
- C) all fish species are warmer than the water around them at all times.
- D) regional endotherms and ectotherms respond identically to changes in water temperature.

Answer: A

### Question 16

Skill: Standard English Conventions: Verb Tense

Nanoengineers have synthesized cerium oxide particles that may improve treatments related to oxidative stress. As nanotechnology evolves, related medical tools \_\_\_\_\_ as well.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) will likely continue to evolve
- B) had likely continued evolving
- C) would likely have continued evolving
- D) has likely continued evolving

Answer: A

### Question 17

Skill: Standard English Conventions: Boundaries

Navajo artist Talia Begay's mastery of traditional weaving is apparent in her baskets, which typically are made from sumac fibers. Begay's work has been shown in museums across the United States, \_\_\_\_\_ it has also been featured in several books on Indigenous art.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) and
- B) but
- C) or
- D) so,

Answer: A

### Question 18

Skill: Standard English Conventions: Form, Structure, and Sense

Among the ancient units of measurement used in Mesopotamia, the units sar and iku were used to measure area; neither unit \_\_\_\_\_ commonly used today.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) is
- B) are
- C) were
- D) have been

Answer: A

### Question 19

Skill: Standard English Conventions: Punctuation

The constellation Lyra contains the bright star Vega, \_\_\_\_\_ one of the most studied stars in the night sky.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) which is

- B) that is  
C) it is  
D) and is it  
Answer: A

### Question 20

Skill: Standard English Conventions: Pronouns

After interviewing several librarians, the student concluded that the library's new catalog was useful because \_\_\_\_\_ allowed patrons to locate books more quickly.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) it  
B) they  
C) them  
D) those  
Answer: A

### Question 21

Skill: Transitions

Many early maps exaggerated the size of unexplored regions. \_\_\_\_\_ later surveys often reduced those regions dramatically once cartographers had more reliable measurements.

Which choice completes the text with the most logical transition?

- A) However,  
B) For instance,  
C) Similarly,  
D) In addition,  
Answer: A

### Question 22

Skill: Transitions

The first version of the machine was slow and expensive. Engineers then replaced several custom parts with standardized ones and simplified the control system. \_\_\_\_\_ the final model could be produced at lower cost.

Which choice completes the text with the most logical transition?

- A) Ultimately,  
B) In contrast,  
C) For example,  
D) Nevertheless,  
Answer: A

### Question 23

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The coast redwood can grow to more than 90 meters tall.
- The Douglas fir can also grow to more than 90 meters tall.
- Both trees are native to parts of western North America.
- The student wants to emphasize a similarity between the two trees.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Both the coast redwood and the Douglas fir can grow to more than 90 meters tall and are native to parts of western North America.
- B) The Douglas fir is one of several trees native to western North America.
- C) The coast redwood can grow taller than many other tree species.
- D) Several tall tree species grow in western North America.

Answer: A

### Question 24

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The Alar scale ranks mineral hardness from 1 to 10.
- Fluorite has a hardness of 4.
- Sapphire has a hardness of 9.
- A mineral with a higher number can scratch one with a lower number.
- The student wants to emphasize sapphire's Alar scale number.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Sapphire has an Alar hardness of 9, meaning it can scratch lower-ranked minerals such as fluorite.
- B) Fluorite has an Alar hardness of 4.
- C) The Alar scale ranks minerals from 1 to 10 by hardness.
- D) Sapphire and fluorite are both minerals that can be ranked on a hardness scale.

Answer: A

### Question 25

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Poet Aria West's first published poem was titled "Harbor Light."
- The poem appeared in the journal Open Shore in 1948.
- West later published three poetry collections.
- The student wants to identify the title of West's first published poem.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Aria West's first published poem was titled "Harbor Light."
- B) In 1948, Aria West published a poem in Open Shore.
- C) Aria West later published three poetry collections.
- D) "Harbor Light" appeared in the journal Open Shore.

Answer: A

### Question 26

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- In classical ballet, first position refers to a stance in which the heels touch and the toes point outward.
- In some folk dances, a similar stance is also used.
- In both stances, the feet form a wide angle.
- The student wants to emphasize a similarity between the two stances.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Both classical ballet's first position and the similar folk-dance stance place the feet at a wide angle.

- B) Classical ballet includes a stance called first position.
- C) Some folk dances use stances that differ from classical ballet positions.
- D) In first position, ballet dancers keep their heels touching.

Answer: A

### **Question 27**

Skill: Expression of Ideas: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Night Script is a 2019 light sculpture by artist Lin Park.
- It is made from hand-bent LED tubes.
- Neon signs became popular with advertisers in the 1920s and with artists in the 1960s.
- Park says the work honors the history of illuminated signs.
- The student wants to connect Park's sculpture to the history of light-based art.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) With Night Script, Park joins a tradition of illuminated signs that began with advertising in the 1920s and became popular with artists in the 1960s.
- B) Night Script is a 2019 sculpture by Lin Park made from hand-bent LED tubes.
- C) LED tubes are easier to shape than some older lighting materials.
- D) Neon signs became popular with advertisers long before Lin Park created Night Script.

Answer: A

## SECTION 2, MODULE 1: Math

### Question 1

Skill: Linear Functions: Graphs and Tables

[Graph: A straight line crosses the y-axis at 3 and passes through the point (1, 5).] The graph shows a linear relationship between  $x$  and  $y$ .

Which table gives three values of  $x$  and the corresponding values of  $y$  for this relationship?

- A)  $x$ : -1, 0, 1;  $y$ : 1, 3, 5
- B)  $x$ : -1, 0, 1;  $y$ : 3, 1, -1
- C)  $x$ : -1, 0, 1;  $y$ : 5, 3, 1
- D)  $x$ : -1, 0, 1;  $y$ : -1, 0, 1

Answer: A

Solution: The line has slope 2 and y-intercept 3, so  $y = 2x + 3$ . For  $x = -1, 0, 1$ , the  $y$ -values are 1, 3, 5.

### Question 2

Skill: Data Analysis: Lines of Best Fit

[Scatterplot: The body length  $L$ , in centimeters, of young seals is modeled by the line  $L = 22a + 48$ , where  $a$  is age in years.] According to this line of best fit, what body length, to the nearest centimeter, is predicted for a seal that is 4 years old?

Answer: 136

Solution: Substitute  $a = 4$ :  $L = 22(4) + 48 = 88 + 48 = 136$ .

### Question 3

Skill: Linear Equations in One Variable

If  $7c + 21 = 63$ , what is the value of  $c + 5$ ?

- A) 6
- B) 11
- C) 26
- D) 47

Answer: B

Solution:  $7c = 42$ , so  $c = 6$ . Therefore  $c + 5 = 11$ .

### Question 4

Skill: Inequalities

For a certain shipping category, the packed mass  $m$ , in grams, of a parcel must be less than 730 grams.

Which inequality represents this situation?

- A)  $m < 730$
- B)  $m > 730$
- C)  $m = 730$
- D)  $m \leq 0$

Answer: A

Solution: 'Less than 730' is represented by  $m < 730$ .

### Question 5

Skill: Ratios and Proportions

A recipe uses 3 cups of oats for every 4 cups of flour. If 28 cups of flour are used, how many cups of oats are needed?

- A) 19
- B) 21
- C) 24
- D) 32

Answer: B

Solution: Oats/flour =  $\frac{3}{4}$ . With 28 cups of flour, oats =  $(\frac{3}{4})(28) = 21$ .

### Question 6

Skill: Statistics: Margin of Error

A company surveyed a random sample of its employees about the number of books they read last year. The estimated mean was 8.6 books with a margin of error of 1.2 books.

Which statement is best supported by the survey?

- A) It is plausible that the mean number of books read by all employees is between 7.4 and 9.8.
- B) Every employee at the company read between 7.4 and 9.8 books.
- C) No employee at the company read more than 9.8 books.
- D) The exact mean number of books read by all employees is 8.6.

Answer: A

Solution: A margin of error gives an interval for the population mean:  $8.6 - 1.2 = 7.4$  and  $8.6 + 1.2 = 9.8$ .

### Question 7

Skill: Data Analysis: Linear Models

[Scatterplot: Points cluster close to a line that crosses the y-axis near 4 and increases by about 3 units in y for every 2 units in x.]

Which equation best represents a line of best fit for the data?

- A)  $y = 1.5x + 4$
- B)  $y = -1.5x + 4$
- C)  $y = 4x + 1.5$
- D)  $y = 1.5x - 4$

Answer: A

Solution: The graph has positive slope about  $\frac{3}{2} = 1.5$  and y-intercept about 4.

### Question 8

Skill: Geometry: Polygon Interior Angles

The sum of the interior angles of a polygon is 1,620 degrees. How many sides does the polygon have?

Answer: 11

Solution: For an n-sided polygon, the sum is  $180(n - 2)$ . Solve  $180(n - 2) = 1620$ , so  $n - 2 = 9$  and  $n = 11$ .

### Question 9

Skill: Nonlinear and Linear Functions

For the function h, the table gives three values of x and their corresponding values of h(x): x = -1, 0, 1 and h(x) = 9, 5, 1.

Which equation could define h?

- A)  $h(x) = -4x + 5$

B)  $h(x) = 4x + 5$

C)  $h(x) = x^2 + 5$

D)  $h(x) = -5x + 4$

Answer: A

Solution: The values decrease by 4 when  $x$  increases by 1, so the slope is -4. Since  $h(0) = 5$ ,  $h(x) = -4x + 5$ .

### Question 10

Skill: Nonlinear Functions: Evaluating Functions

The graph of  $y = f(x)$  is the parabola  $f(x) = 2x^2 - 3$ . What is the  $y$ -coordinate of the point on the graph where  $x = 4$ ?

Answer: 29

Solution:  $f(4) = 2(4^2) - 3 = 32 - 3 = 29$ .

### Question 11

Skill: Linear Equations in One Variable

What is the solution to  $3(2r - 5) = 27$ ?

A) 5

B) 6

C) 7

D) 14

Answer: C

Solution:  $6r - 15 = 27$ , so  $6r = 42$  and  $r = 7$ .

### Question 12

Skill: Percentages

The price of a jacket increased from \$80 to \$92. By what percent did the price increase?

A) 12%

B) 15%

C) 18%

D) 20%

Answer: B

Solution: The increase is  $92 - 80 = 12$ . Then  $12/80 = 0.15 = 15\%$ .

### Question 13

Skill: Systems of Linear Equations

The system of equations  $y = 3x + 2$  and  $y = x + 8$  is graphed in the  $xy$ -plane. What is the  $x$ -coordinate of the intersection point?

Answer: 3

Solution: Set the expressions equal:  $3x + 2 = x + 8$ , so  $2x = 6$  and  $x = 3$ .

### Question 14

Skill: Geometry: Circles

A circle has circumference  $18\pi$ . What is the area of the circle?

A)  $18\pi$

B)  $36\pi$

C)  $81\pi$

D)  $324\pi$

Answer: C

Solution:  $C = 2\pi r$ . If  $18\pi = 2\pi r$ , then  $r = 9$ .  $\text{Area} = \pi r^2 = 81\pi$ .

### Question 15

Skill: Ratios, Proportions, and Percents

An object weighs 150 pounds on Earth and 168 pounds on Neptune. The object's weight on Neptune is 70% of its weight on Jupiter. The object's weight on Jupiter is what percent of its weight on Earth?

A) 112%

B) 140%

C) 160%

D) 240%

Answer: C

Solution:  $168 = 0.70J$ , so  $J = 240$ . As a percent of Earth weight,  $240/150 = 1.6 = 160\%$ .

### Question 16

Skill: Linear Equations: Intercepts

A line in the  $xy$ -plane has equation  $5x + 4y = 40$ . What is the  $x$ -intercept of the line?

Answer: 8

Solution: At the  $x$ -intercept,  $y = 0$ . Then  $5x = 40$ , so  $x = 8$ .

### Question 17

Skill: Exponential Functions

The function  $P(t) = 600(1.04)^t$  models the number of bacteria in a culture  $t$  hours after an observation begins.

What is the number of bacteria when  $t = 0$ ?

A) 4

B) 24

C) 600

D) 624

Answer: C

Solution:  $P(0) = 600(1.04)^0 = 600$ .

### Question 18

Skill: Equivalent Expressions and Equations

How many solutions does the equation  $2(x + 7) = 2x + 14$  have?

A) Zero

B) Exactly one

C) Exactly two

D) Infinitely many

Answer: D

Solution: Both sides simplify to  $2x + 14$ , so the equation is true for all  $x$ .

### Question 19

Skill: Geometry: Area and Perimeter

A rectangle has width  $x$  and length  $3x + 2$ . If the perimeter of the rectangle is 44, what is its area?

A) 55

B) 65

C) 75

D) 85

Answer: D

Solution:  $2(x + 3x + 2) = 44$ , so  $8x + 4 = 44$  and  $x = 5$ . The length is 17 and the area is  $5(17) = 85$ .

### Question 20

Skill: Probability

A bag contains 6 blue tiles, 4 red tiles, and 5 green tiles. If one tile is selected at random, what is the probability that it is red?

A)  $\frac{4}{15}$

B)  $\frac{2}{5}$

C)  $\frac{4}{11}$

D)  $\frac{11}{15}$

Answer: A

Solution: There are  $6 + 4 + 5 = 15$  tiles total and 4 red tiles, so the probability is  $\frac{4}{15}$ .

### Question 21

Skill: Quadratic Functions: Zeros

The graph of  $y = g(x)$ , where  $g(x) = x^2 - 10x + 24$ , is shown in the  $xy$ -plane. How many  $x$ -intercepts does the graph have?

Answer: 2

Solution: Factor:  $x^2 - 10x + 24 = (x - 4)(x - 6)$ . There are two distinct zeros, so there are two  $x$ -intercepts.

### Question 22

Skill: Geometry and Trigonometry

In right triangle ABC, angle B is the right angle. If  $AB = 24$  and  $BC = 7$ , what is  $\tan(A)$ ?

Answer:  $\frac{7}{24}$

Solution: For angle A, the opposite side is  $BC = 7$  and the adjacent leg is  $AB = 24$ , so  $\tan(A) = \frac{7}{24}$ .

## SECTION 2, MODULE 2: Math

### Question 1

Skill: Linear Equations in One Variable

If  $4(3x - 2) = 52$ , what is the value of  $x$ ?

- A) 3
- B) 4
- C) 5
- D) 6

Answer: C

Solution:  $12x - 8 = 52$ , so  $12x = 60$  and  $x = 5$ .

### Question 2

Skill: Geometry: Circles

A circle has a radius of 19 meters. What is the area, in square meters, of the circle?

- A)  $38\pi$
- B)  $190\pi$
- C)  $361\pi$
- D)  $722\pi$

Answer: C

Solution: Area =  $\pi r^2 = \pi(19^2) = 361\pi$ .

### Question 3

Skill: Linear Functions: Slope

The function  $f$  is defined by  $f(x) = -9x + 14$ .

What is the slope of the graph of  $y = f(x)$  in the  $xy$ -plane?

- A) -14
- B) -9
- C) 9
- D) 14

Answer: B

Solution: For  $y = mx + b$ , the slope is  $m$ . Here  $m = -9$ .

### Question 4

Skill: Linear Models

A linear model estimates the population of a town,  $P$ ,  $t$  years after 2020 by  $P = 4,200 + 85t$ . According to the model, what is the estimated population in 2026?

Answer: 4710

Solution: The year 2026 is 6 years after 2020, so  $t = 6$ .  $P = 4200 + 85(6) = 4710$ .

### Question 5

Skill: Quadratic Equations

$$w^2 + 8w - 33 = 0$$

What is the positive solution to the given equation?

- A) 3
- B) 8
- C) 11
- D) 33

Answer: A

Solution: Factor:  $w^2 + 8w - 33 = (w + 11)(w - 3)$ . The positive solution is  $w = 3$ .

### Question 6

Skill: Systems of Linear Equations

If  $2x + y = 17$  and  $x - y = 1$ , what is the value of  $x + y$ ?

Answer: 11

Solution: Add the equations after solving: from  $x - y = 1$ ,  $y = x - 1$ . Substitute into  $2x + y = 17$  to get  $3x - 1 = 17$ , so  $x = 6$  and  $y = 5$ . Thus  $x + y = 11$ .

### Question 7

Skill: Exponential Growth

On January 1, a video had 150 views. The number of views doubled every 3 days. If this pattern continued, how many views did the video have 12 days after January 1?

- A) 600
- B) 1,200
- C) 2,400
- D) 4,800

Answer: C

Solution: Twelve days is four 3-day periods. The number of views is  $150(2^4) = 150(16) = 2400$ .

### Question 8

Skill: Geometry: Area

A triangle has a base of 18 inches and a height of 7 inches. What is the area of the triangle, in square inches?

- A) 25
- B) 63
- C) 126
- D) 252

Answer: B

Solution: Area =  $(1/2)(\text{base})(\text{height}) = (1/2)(18)(7) = 63$ .

### Question 9

Skill: Equivalent Equations

How many solutions does the equation  $5(4x - 3) = 20x - 15$  have?

- A) Zero
- B) Exactly one
- C) Exactly two
- D) Infinitely many

Answer: D

Solution: The left side expands to  $20x - 15$ , which is identical to the right side. The equation has infinitely many solutions.

### Question 10

Skill: Ratios and Proportions

Seventy-five percent of quantity A is equal to sixty percent of quantity B. What is the value of A/B?

- A) 0.45
- B) 0.8
- C) 1.25
- D) 1.35

Answer: B

Solution:  $0.75A = 0.60B$ . Dividing by  $0.75B$  gives  $A/B = 0.60/0.75 = 0.8$ .

### Question 11

Skill: Linear Equations in One Variable

If  $(x - 4)/3 = 8$ , what is the value of  $x$ ?

- A) 12
- B) 20
- C) 24
- D) 28

Answer: D

Solution: Multiply by 3:  $x - 4 = 24$ . Therefore  $x = 28$ .

### Question 12

Skill: Quadratic Functions: Vertex Form

The function  $q$  is defined by  $q(x) = (x - 5)^2 + 7$ . What is the minimum value of  $q(x)$ ?

- A) 5
- B) 7
- C) 12
- D) 25

Answer: B

Solution: The square term is always nonnegative, so the minimum occurs when  $(x - 5)^2 = 0$ . The minimum value is 7.

### Question 13

Skill: Data Analysis: Tables

[Table: Growth rates before and after a trade agreement. Country | Exports to partner before | Exports to partner after | Total exports before | Total exports after. Arcona: 5 | 12 | 7 | 14. Bellora: 9 | 18 | 20 | 11. Caldia: -3 | -6 | 2 | 9. Darsen: 8 | 6 | 10 | 4.]

A researcher claims that, for one country, the agreement may have redirected exports toward the partner rather than increasing exports overall.

Which country best supports the claim?

- A) Arcona
- B) Bellora
- C) Caldia
- D) Darsen

Answer: B

Solution: Bellora's export growth to the partner increased from 9 to 18, but its total export growth decreased from 20 to 11, suggesting redirection.

### Question 14

Skill: Function Notation and Polynomial Expressions

If  $f(x) = 2x^2 + 3x$  and  $g(x) = f(x + 1) - f(x)$ , which expression is equivalent to  $g(x)$ ?

- A)  $4x + 5$
- B)  $4x + 1$
- C)  $2x + 5$
- D)  $2x^2 + 5x$

Answer: A

Solution:  $f(x + 1) = 2(x + 1)^2 + 3(x + 1) = 2x^2 + 7x + 5$ . Subtract  $f(x) = 2x^2 + 3x$  to get  $4x + 5$ .

### Question 15

Skill: Coordinate Geometry: Circles

A circle in the  $xy$ -plane has equation  $(x - 3)^2 + (y + 2)^2 = 49$ . What is the center of the circle?

- A) (3, -2)
- B) (-3, 2)
- C) (3, 2)
- D) (-3, -2)

Answer: A

Solution: The standard form is  $(x - h)^2 + (y - k)^2 = r^2$ . Here  $h = 3$  and  $k = -2$ .

### Question 16

Skill: Linear Functions: Slope from a Point

The line  $y = kx + 6$  passes through the point (4, 22). What is the value of  $k$ ?

Answer: 4

Solution: Substitute (4, 22):  $22 = 4k + 6$ , so  $16 = 4k$  and  $k = 4$ .

### Question 17

Skill: Function Composition

Let  $f(x) = 3x - 2$  and  $g(x) = x^2$ . What is  $f(g(5))$ ?

- A) 23
- B) 25
- C) 73
- D) 221

Answer: C

Solution:  $g(5) = 25$ . Then  $f(25) = 3(25) - 2 = 73$ .

### Question 18

Skill: Geometry: Volume

A right circular cylinder has radius 3 centimeters and height 10 centimeters. What is its volume, in cubic centimeters?

- A)  $30\pi$
- B)  $60\pi$
- C)  $90\pi$
- D)  $300\pi$

Answer: C

Solution: Volume =  $\pi r^2 h = \pi(3^2)(10) = 90\pi$ .

### Question 19

Skill: Radical Equations

If  $\sqrt{x + 5} = 8$ , what is the value of  $x$ ?

- A) 3
- B) 13
- C) 59
- D) 69

Answer: C

Solution: Square both sides:  $x + 5 = 64$ , so  $x = 59$ .

### Question 20

Skill: Statistics: Mean

The mean of the numbers 8, 11,  $n$ , and 17 is 14. What is the value of  $n$ ?

Answer: 20

Solution: The total of four numbers with mean 14 is 56. Since  $8 + 11 + 17 = 36$ ,  $n = 56 - 36 = 20$ .

### Question 21

Skill: Geometry and Trigonometry

In right triangle ABC, angle C is the right angle,  $AC = 12$ ,  $BC = 9$ , and  $AB = 15$ . What is  $\sin(A)$ ?

Answer:  $3/5$  or 0.6

Solution: For angle A, the opposite side is  $BC = 9$  and the hypotenuse is  $AB = 15$ , so  $\sin(A) = 9/15 = 3/5 = 0.6$ .

### Question 22

Skill: Percentages

A store reduced the price of a tablet from \$250 to \$190. The new price is what percent less than the original price?

Answer: 24

Solution: The decrease is  $250 - 190 = 60$ . The percent decrease is  $60/250 = 0.24 = 24\%$ .

## Answer Key

### SECTION 1, MODULE 1: Reading and Writing

| Q  | Answer | Q  | Answer |
|----|--------|----|--------|
| 1  | B      | 15 | A      |
| 2  | A      | 16 | A      |
| 3  | A      | 17 | A      |
| 4  | A      | 18 | A      |
| 5  | B      | 19 | A      |
| 6  | A      | 20 | A      |
| 7  | A      | 21 | A      |
| 8  | B      | 22 | A      |
| 9  | A      | 23 | A      |
| 10 | A      | 24 | A      |
| 11 | A      | 25 | A      |
| 12 | A      | 26 | A      |
| 13 | A      | 27 | A      |
| 14 | A      |    |        |

### SECTION 1, MODULE 2: Reading and Writing

| Q  | Answer | Q  | Answer |
|----|--------|----|--------|
| 1  | A      | 15 | A      |
| 2  | A      | 16 | A      |
| 3  | A      | 17 | A      |
| 4  | A      | 18 | A      |
| 5  | A      | 19 | A      |
| 6  | A      | 20 | A      |
| 7  | A      | 21 | A      |
| 8  | A      | 22 | A      |
| 9  | A      | 23 | A      |
| 10 | A      | 24 | A      |
| 11 | A      | 25 | A      |
| 12 | A      | 26 | A      |
| 13 | A      | 27 | A      |
| 14 | A      |    |        |

### SECTION 2, MODULE 1: Math

| Q | Answer | Q  | Answer |
|---|--------|----|--------|
| 1 | A      | 12 | B      |

|    |     |    |      |
|----|-----|----|------|
| 2  | 136 | 13 | 3    |
| 3  | B   | 14 | C    |
| 4  | A   | 15 | C    |
| 5  | B   | 16 | 8    |
| 6  | A   | 17 | C    |
