

SAT-Style Practice Test - Spring 2026 Original Version

Independent practice material. This test is original SAT-style content and is not affiliated with or endorsed by College Board.

SECTION 1, MODULE 1: Reading and Writing

Question 1

Skill: Words in Context

In the 1980s, geologists lowered sensors into a deep Antarctic ice shelf and gathered thousands of temperature readings. Decades later, climate historian Dr. Imani Rao combined those readings with new satellite models, showing that the old measurements remain valuable for understanding the pace of ice loss. The archive's value to science is _____.

Which choice completes the text with the most logical and precise word or phrase?

- A) transient
- B) decorative
- C) enduring
- D) accidental

Answer: C

Question 2

Skill: Command of Evidence - Textual

The following text is adapted from a novel about a young violin student preparing for a city recital.

For the audition, I was meant to play an etude that my teacher had marked carefully in red pencil. I did run through the first few measures, but then I began "sketching," repeating little fragments and changing the rhythm whenever a better one occurred to me. I was not listening for the notes on the page so much as for the music I wanted to hear.

Based on the text, when the narrator says she began "sketching," what does she most likely mean?

- A) She was violating an expectation about how the piece should be performed.
- B) She was gaining an unfair advantage over the other auditioners.
- C) She was deceiving her music teacher about how often she practiced.
- D) She was lying to herself about the difficulty of the etude.

Answer: A

Question 3

Skill: Words in Context

The Early Radio Lexicon is a volunteer-built database begun by archivist Theo Lansing in 2004 to trace how technical phrases entered broadcasting. Volunteers digitized repair manuals, newspaper columns, and station logs that provide _____ of early uses of terms such as "carrier wave" and "studio feed."

Which choice completes the text with the most logical and precise word or phrase?

- A) attestations
- B) concessions
- C) revisions
- D) excuses

Answer: A

Question 4

Skill: Words in Context

Contemporary museums often use projections, soundscapes, and interactive labels to immerse visitors in an exhibit. Because audiences have become accustomed to these carefully designed spaces, a plain gallery can feel unusual. But such galleries were once far from unusual: in many nineteenth-century museums, unadorned rooms were _____ rather than surprising.

Which choice completes the text with the most logical and precise word or phrase?

- A) improbable
- B) customary
- C) perplexing
- D) rejected

Answer: B

Question 5

Skill: Central Ideas and Details

Having difficulty clearing mats of water hyacinth from canals? One unexpected response may be to harvest the plant. Its spongy stems can be dried and woven into sturdy panels that are useful for packaging and insulation. In regions where the plant clogs waterways, turning it into a raw material can reduce cleanup costs while creating a marketable product.

Which choice best states the main purpose of the text?

- A) To suggest an unexpected solution to a problem
- B) To compare two ways of maintaining canals
- C) To describe the flavor of an edible plant
- D) To identify a recent trend in architecture

Answer: A

Question 6

Skill: Text Structure and Purpose

For much of the twentieth century, novels set in Appalachian coal towns were often expected to present realistic accounts of labor, family, and poverty. Recently, however, younger Appalachian writers have embraced genres once thought remote from the region, such as speculative fiction, satire, and horror. Ashby Collins is often cited as part of this shift; his 2022 novel *Hollow Signal* uses supernatural elements to examine mine closures and memory.

Which choice best describes the overall structure of the text?

- A) It discusses fiction from an earlier tradition, then explains how some more recent fiction differs from that tradition.
- B) It praises one regional writer, then criticizes another regional writer.
- C) It gives an overview of Appalachian literature, then compares it to literature from another country.
- D) It describes one author's early works, then describes that author's later works.

Answer: A

Question 7

Skill: Text Structure and Purpose

In 2015, Rana and colleagues published a study concluding that bumblebees could not learn a complex sequence of colored patterns. However, that study used only nine bees. In 2023, entomologists Priya Nandakumar and Elise Cho reviewed many experiments on bee learning and cautioned that studies based on very small samples can exaggerate what bees can or cannot do. Such experiments, they argued, should be treated as preliminary.

Which choice best describes the function of the underlined sentence in the text?

- A) It presents a criticism of the results reported by Nandakumar and Cho.
- B) It lists several traits of bumblebees discovered during the 2023 review.
- C) It emphasizes where Rana and colleagues conducted their study.
- D) It states the conclusion reached by Rana and colleagues in their study.

Answer: D

Question 8

Skill: Command of Evidence - Textual

The dust and jagged rock fragments on the Moon can damage robotic wheels and drill bits. To prepare equipment for lunar missions, engineers use simulants: materials designed to imitate different planetary surfaces. Simulants such as the Mare-7 mixture, made from crushed basalt, help researchers estimate how well a device will perform before it is exposed to actual lunar conditions.

Based on the text, what is one reason simulants are valuable to scientists?

- A) Simulants allow scientists to test whether equipment can withstand some conditions it may encounter during a mission.
- B) Simulants allow scientists to track how the chemical properties of lunar soil have changed over time.
- C) Simulants can be mixed with soil from Earth to explore how ordinary farmland reacts to drilling equipment.
- D) Simulants are used to compare the Moon's surface directly with the surfaces of all other planets.

Answer: A

Question 9

Skill: Command of Evidence - Quantitative

[Table: Millions of metric tons of bauxite mined in 2005 and 2025. Country - 2005 - 2025. Malaysia - 0.18 - 0.46. Jamaica - 14.1 - 7.9. Ghana - 0.62 - 1.48. Brazil - 21.3 - 34.6.]

While doing research for a paper about bauxite mining, a student finds information about production in different countries in 2005 and 2025. The student notes that Ghana produced 0.62 million metric tons of bauxite in 2005 and _____.

Which choice most effectively uses data from the table to complete the statement?

- A) 1.48 million metric tons of bauxite in 2025
- B) 0.46 million metric tons of bauxite in 2025
- C) 7.9 million metric tons of bauxite in 2025
- D) 34.6 million metric tons of bauxite in 2025

Answer: A

Question 10

Skill: Command of Evidence - Textual

For many years, historian Marta Ilyin argued that a ledger from a fourteenth-century trading house contained the earliest known use of a minus sign to mark debt. Some scholars doubted the claim, suggesting that the mark was merely a decorative dash. Ilyin responded that the mark appears only before quantities owed by customers, not before quantities paid to the firm, and that this pattern shows it had a numerical function.

Which finding, if true, would most directly support Ilyin's claim?

- A) Several decorative dashes appear in the ledger's headings and page borders.
- B) In one entry, a small horizontal mark appears directly before a quantity recorded as owed by a customer, while no such mark appears before quantities recorded as payments.
- C) The ledger was copied by two different clerks whose handwriting styles were not identical.
- D) Some calculations in the ledger contain arithmetic errors unrelated to debts or payments.

Answer: B

Question 11

Skill: Command of Evidence - Quantitative

[Table: Average monetized productivity loss at two points after programs began, in Australian dollars. Type of training - 8 weeks - 10 months. Ergonomic practice sessions - 320 - 180. Wellness lectures - 305 - 425.]

Dr. Laila Osman and colleagues hypothesized that workplace training could reduce productivity losses related to employee discomfort. They compared two programs: one gave employees ergonomic practice sessions, and the other gave employees general wellness lectures. The researchers concluded that ergonomic practice sessions were more effective at restraining productivity loss, though the benefit took time to become apparent.

Which choice uses data from the table to most effectively strengthen Osman and colleagues' conclusion?

- A) Productivity loss was largely due to absenteeism for the ergonomic group at 10 months but due to presenteeism for the wellness group.
- B) Productivity loss for the ergonomic group decreased from 8 weeks to 10 months, while productivity loss for the wellness group increased during the same period.
- C) Productivity loss was consistently higher for the wellness group than for the ergonomic group throughout the study, and the difference never changed.
- D) Productivity loss was identical for the two groups 8 weeks after the programs began and identical again after 10 months.

Answer: B

Question 12

Skill: Command of Evidence - Quantitative

[Graph: Average enjoyment ratings, from 1 to 8, for five short stories. For each story, one bar shows readers who received no spoiler and one bar shows readers who received a spoiler. Star Ferry: unspoiled 4.5, spoiled 5.2. Glass Orchard: unspoiled 5.0, spoiled 5.1. North Window: unspoiled 6.4, spoiled 7.1. Paper Bells: unspoiled 5.3, spoiled 4.1. Last Lantern: unspoiled 4.8, spoiled 5.0.]

Researchers investigated whether knowing a key plot development changes readers' enjoyment of a story. For most stories, readers who received spoilers rated the stories slightly higher than readers who did not. But the degree of this difference varied, as shown most clearly by the ratings for _____.

Which choice most effectively uses data from the graph to complete the statement?

- A) North Window and Glass Orchard
- B) Star Ferry and Last Lantern
- C) Paper Bells and Glass Orchard
- D) Paper Bells and Last Lantern

Answer: A

Question 13

Skill: Inferences

Many humans are right-handed, and some scientists study whether other primates show similar population-level right-handedness (PLRH). A 1998 study of wild orangutans reported little PLRH, while several later studies of captive orangutans found much higher rates of right-handed behavior. Because the earlier study measured hand use during tree climbing and the later studies measured hand use during feeding tasks, the difference in results may be partly explained by differences in what was being measured.

Which choice most logically completes the text?

- A) the number of orangutans in the 1998 study was sufficient to prove that orangutans never show PLRH.
- B) the later studies must have used inaccurate methods for observing captive animals.
- C) the greater exposure to humans among captive orangutans caused them to become more right-handed.
- D) the apparent discrepancy between studies may be attributable to the studies using different criteria when assessing hand dominance.

Answer: D

Question 14

Skill: Inferences

The silver ibis and the marsh ibis are long-legged birds that nest in wetlands. Dr. Anja Bell and colleagues examined how these birds choose nesting areas by recording water depth and the number of days standing water remained during the breeding season. They found that although only silver ibises preferred areas with deep water, both silver and marsh ibises preferred areas in which standing water remained for fewer than 50 days per year. The researchers therefore concluded that neither species is strongly attracted to areas where _____.

Which choice most logically completes the text?

- A) standing water remains for most of the breeding season.
- B) species with breeding seasons longer than 50 days are likely to be present.
- C) features that attract only one of the two species are absent.
- D) the water is relatively deep during the breeding season.

Answer: A

Question 15

Skill: Inferences

Publishers must balance readability, durability, and cost when producing very long books. In one English edition, Aruna Patel's *The River Without Sleep* was published in 900 pages and runs to an estimated 630,000 words, while Mateo Ruiz's *Winter Atlas* was published in 1,120 pages and runs to an estimated 560,000 words. This indicates that _____.

Which choice most logically completes the text?

- A) the edition of *The River Without Sleep* has more words per page than the edition of *Winter Atlas*.
- B) translating a text into English is likely to decrease its word count.
- C) page count is always a more reliable indicator of reading time than word count.
- D) the edition of *Winter Atlas* must be printed on thinner paper than the edition of *The River Without Sleep*.

Answer: A

Question 16

Skill: Standard English Conventions - Verbs

Map of the Southern Constellations is one of the few surviving works by astronomer Livia Caruso. _____ in 1742, the map is now held by the Maritime Museum of Valencia.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) Drawn
- B) Will draw
- C) Draws
- D) Was drawing

Answer: A

Question 17

Skill: Standard English Conventions - Nonfinite Clauses

Engineered calcium-silicate fibers can strengthen the surface of damaged stone monuments, a function well suited for conservation projects _____ from the fibers' ability to bind with mineral surfaces.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) stemming
- B) having stemmed
- C) stems
- D) to stem

Answer: A

Question 18

Skill: Standard English Conventions - Boundaries

The Niger-Congo language family includes more than 1,500 languages _____ including Wolof and Fula, which are spoken by millions of people - and accounts for a large share of the languages spoken in sub-Saharan Africa.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) languages
- B) languages -
- C) languages,
- D) languages:

Answer: B

Question 19

Skill: Standard English Conventions - Boundaries

For the past 10,000 years, Earth's deserts have generally remained in roughly the same broad regions. This has not always been the _____ through geologic history, deserts have expanded, contracted, and shifted location many times.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) case, though;
- B) case, though,
- C) case though;
- D) case, though

Answer: A

Question 20

Skill: Standard English Conventions - Boundaries

Fiber artist Nala Petrova turns ordinary kitchen tools into playful sculptures. In one installation, a row of wooden spoons becomes a flock of birds hanging from a _____ the spoons' handles form the birds' long legs.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) shelf,
- B) shelf;
- C) shelf -
- D) shelf:

Answer: D

Question 21

Skill: Transitions

Many early modernist builders celebrated sharp angles and machine-like surfaces. Sculptor Lina Varga, _____, found inspiration in curved vines, seedpods, and seashells, and her buildings are known for their rounded walls and organic forms.

Which choice completes the text with the most logical transition?

- A) Furthermore
- B) Still
- C) Similarly
- D) In other words

Answer: B

Question 22

Skill: Transitions

In New Zealand, citizens must be at least 18 years old to vote in national elections. _____ citizens of the Cook Islands must also be at least 18 years old to vote in parliamentary elections.

Which choice completes the text with the most logical transition?

- A) Firstly,
- B) By comparison,
- C) For example,
- D) Therefore,

Answer: B

Question 23

Skill: Transitions

Sleek bicycles generally move through air more efficiently than bulky cargo bikes. _____ a racing bicycle with narrow handlebars produces less wind resistance than a box-front delivery bike carrying the same rider.

Which choice completes the text with the most logical transition?

- A) Specifically,
- B) On the other hand,
- C) As a result,
- D) In conclusion,

Answer: A

Question 24

Skill: Transitions

As a supporter of centralized banking, economist Rachel Waring favored strict national rules for currency. _____, in essays published in 1821, she criticized one proposed banking bill because she believed it gave too much power to private lenders.

Which choice completes the text with the most logical transition?

- A) In other words
- B) Finally
- C) By comparison
- D) Nevertheless

Answer: D

Question 25

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Tarian is a district in northern Laos.
- Districts are governmental areas responsible for many public services.
- Tarian covers an area of roughly 220 square kilometers.
- Northern Laos contains many mountainous districts.

The student wants to emphasize the size of Tarian.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Tarian, a district in northern Laos, covers an area of roughly 220 square kilometers.
- B) Tarian is a governmental district in northern Laos that provides many public services.
- C) Tarian is one of many mountainous districts in northern Laos.
- D) Public services are provided by governmental areas called districts.

Answer: A

Question 26

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The United States has designated more than 600 areas as National Marine Sanctuaries or National Wildlife Refuges.
- Some refuges were established specifically to protect threatened species.
- Pelican Key Refuge is a 5,200-acre area in Florida.
- It was established to protect the brown pelican.
- Koloa Marsh Refuge is a 72-acre area in Hawaii.
- It was established to protect the Hawaiian coot.

The student wants to emphasize a similarity between Pelican Key Refuge and Koloa Marsh Refuge.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Both Pelican Key Refuge and Koloa Marsh Refuge were established to protect threatened bird species.
- B) Pelican Key Refuge is much larger than Koloa Marsh Refuge.
- C) Koloa Marsh Refuge is located in Hawaii, whereas Pelican Key Refuge is located in Florida.
- D) The United States has designated more than 600 protected areas.

Answer: A

Question 27

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Artist Mara Volkov's collage *Clock Garden* belongs to the surrealist tradition.
- Surrealist collage often depends on irrational juxtaposition.
- Irrational juxtaposition is the surprising placement of unrelated objects together.
- *Clock Garden* places a pocket watch, a rowboat, and a sleeping fox inside a glass greenhouse.

The student wants to provide a specific example of irrational juxtaposition in surrealist collage.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) A pocket watch, a rowboat, and a sleeping fox appear together inside a greenhouse in Mara Volkov's surrealist collage *Clock Garden*.
- B) Irrational juxtaposition is a central feature of many works in the surrealist tradition.
- C) Mara Volkov's *Clock Garden* is an example of a surrealist collage.
- D) Surrealist collage manifests the unconscious mind by placing unrelated objects together.

Answer: A

SECTION 1, MODULE 2: Reading and Writing

Question 1

Skill: Words in Context

Like many river deltas, the Irrawaddy delta is ____: its channels, sandbars, and islands continually change shape as the river deposits new sediment where it meets the sea.

Which choice completes the text with the most logical and precise word or phrase?

- A) unrivaled
- B) dynamic
- C) sustainable
- D) immutable

Answer: B

Question 2

Skill: Words in Context

After comparing the face in Artemisia Gentileschi's *Self-Portrait as the Allegory of Painting* with several signed drawings, art historian Leon Park argued that the painting may contain another likeness of the artist herself. By overlaying digitized images of the works, Park ____ the two faces' structural resemblance.

Which choice completes the text with the most logical and precise word or phrase?

- A) corroborated
- B) amalgamated
- C) prolonged
- D) diminished

Answer: A

Question 3

Skill: Words in Context

Modern composers may draw on earlier musical traditions, but the scope of those influences can be wide. The works of Turkish composer İlhan Demir, for example, can be said to ____ elements of Ottoman court music, Balkan dance rhythms, and contemporary electronic sound.

Which choice completes the text with the most logical and precise word or phrase?

- A) defy
- B) neglect
- C) foretell
- D) exhibit

Answer: D

Question 4

Skill: Words in Context

During the 2011 debt crisis, several central banks offered emergency credit lines to selected countries. Economist Nadia Salim found that countries' domestic policy environments appeared to have ____ credit-line decisions: the probability of receiving assistance was higher in countries with open financial regulations than in countries with tighter restrictions.

Which choice completes the text with the most logical and precise word or phrase?

- A) predicated on
- B) mediated
- C) decoupled from
- D) material to

Answer: B

Question 5

Skill: Central Ideas and Details

Although novelist Jonah Reed is less widely read than some American writers of the last century, critics continue to discuss his work. Literary critic Haruko Blake argues that Reed's novel *Small Weather* is especially impressive because it combines the emotional force of domestic fiction with the philosophical ambition of experimental fiction. For Blake, the novel shows that a book can be both intimate and intellectually daring.

Which choice best states the main purpose of the text?

- A) To present a reason why a literary critic is impressed by a certain novel
- B) To explain what inspired an author to write a particular work
- C) To compare the work of a novelist with the work of a poet who admired him
- D) To argue that all writing must be classified as belonging to one of two categories

Answer: A

Question 6

Skill: Text Structure and Purpose

The following text is adapted from an 1899 novel. Mr. Bellamy is a lawyer in a small town.

By the standards of Lindenford, Mr. Bellamy was a man of consequence. His neighbors spoke of his polished manners, and the local paper mentioned him whenever a public dinner required a dignified toast. Yet Mr. Bellamy never let either praise or laughter come too near him. If a compliment was offered, he accepted it with a bow; if a joke threatened to include him, he adjusted his gloves and turned to the window.

Which choice best describes the overall structure of the text?

- A) It implies that Mr. Bellamy's neighbors are more naive than people elsewhere and then explains why they have been misled.
- B) It presents the favorable opinion of Mr. Bellamy that other people hold and then describes the behavior that helps him maintain that opinion.
- C) It shows that Mr. Bellamy was once disliked by his friends and then describes how he regained their regard.
- D) It highlights a difference between Mr. Bellamy's public and private behavior and then reveals a hidden secret.

Answer: B

Question 7

Skill: Cross-Text Connections

Text 1

In Clara Baines's 1908 novel *Northward Line*, the old Eastgate Station suggests possibility to the protagonist Ada. Its dim roof and worn platforms may look unimpressive beside the new glass terminal nearby, but Eastgate is where trains leave the industrial city for the coastal villages Ada associates with honesty and enduring personal ties.

Text 2

Critics often read the contrast between Eastgate Station and the new terminal in *Northward Line* as part of the novel's larger opposition between two social values: on one hand, the city's emphasis on efficiency, wealth, and modern display; on the other, the coast's emphasis on memory, obligation, and what the novel calls "plain fidelity."

Based on the texts, the author of Text 2 would most likely agree with which statement about Eastgate Station as it is depicted in Text 1?

- A) Because it connects the industrial city to the coast, Eastgate helps embody the novel's contrast between modern practicality and a more traditional set of values.
- B) The modest appearance of Eastgate misleads Ada into believing that coastal life will be less meaningful than city life.
- C) Eastgate is a symbol of wealth because its architecture is newer and more decorative than that of the glass terminal.
- D) The novel uses Eastgate primarily to show that Ada has no interest in personal obligations.

Answer: A

Question 8

Skill: Inferences

Mexican architect Carmen Orozco's career, which spanned the 1930s to the 1980s, changed dramatically over time. After traveling in Europe in 1934 and encountering functionalist architecture, Orozco designed several apartment buildings with clean geometric forms and minimal ornament. Later, however, houses such as Casa del Río used courtyards, tiled screens, and shaded terraces that reflected regional building traditions in Jalisco.

Information in the text best supports which statement about Orozco's early apartment buildings?

- A) They represent a transitional moment between the early and late phases of Orozco's development.
- B) They display the influence of Orozco's later interest in regional Jalisco traditions.
- C) They are characteristic of the Jalisco architecture that influenced Orozco throughout her career.
- D) They reflect an approach to ornamentation that Orozco never used again in any form.

Answer: A

Question 9

Skill: Command of Evidence - Textual

The following text is from a contemporary novel. The narrator is describing a retired government official.

Finally, and adding a needed quantity of ceremony, there was Sir Malcolm Hart, whose white hair formed a crest above his forehead and whose medals made a soft music when he moved. His recently published memoirs promised to illuminate a lifetime of public service, but even after eighty pages, the reader had learned mostly that committees had met, documents had circulated, and matters of importance had remained, apparently, important.

Based on the text, which choice best describes Sir Malcolm Hart?

- A) He has the appearance of a distinguished figure, but it is uncertain whether he has accomplished anything of real distinction.
- B) He has maintained a modest profile even though he has served the public capably for many years.
- C) He looks like a person worthy of respect, but his memoirs reveal that many of his actions were dishonorable.
- D) He would be celebrated publicly if his achievements did not have to remain secret.

Answer: A

Question 10

Skill: Command of Evidence - Textual

Coastal towns sometimes build hard structures such as seawalls to prevent erosion. Marine ecologist Darren Keel and colleagues surveyed bird communities at sites protected by different kinds of shoreline structures. They found that seawalls were more strongly associated with lower Bird Community Integrity Index (BCII) scores than were softer protections such as planted dunes.

Which finding, if true, would most directly illustrate the researchers' finding?

- A) Bird communities at Harbor Point, a site with a high percentage of shoreline consisting of seawalls, had lower average BCII scores than bird communities at Pine Dune, a site with a low percentage of shoreline consisting of seawalls.
- B) Bird communities at Harbor Point and Pine Dune had the same average BCII scores even though the sites had different shoreline protections.
- C) Bird communities at two sites with the same percentage of seawalls had very different BCII scores.
- D) The difference in BCII scores between two dune-protected sites was statistically insignificant.

Answer: A

Question 11

Skill: Command of Evidence - Textual

For its 2024 exhibition *Watching the Walls*, the Riverton Museum asked its security guards to curate small displays from the permanent collection. The museum's director claimed that the project amplified a perspective rarely given a formal platform in museum curation: that of the people who spend long hours protecting and observing the art.

Which quote from a guard who curated part of the exhibition would best support the director's claim?

- A) "I chose works I pass every night because standing near them for years has made me notice details most visitors miss."
- B) "The most enjoyable part of curating the display was seeing visitors admire the museum's famous paintings."
- C) "My selections were intended mainly to advertise the museum's newest acquisitions."
- D) "I relied entirely on the senior curators to decide which works belonged in the display."

Answer: A

Question 12

Skill: Command of Evidence - Textual

A student is writing an essay about cultured leather, which is grown in a laboratory and is intended to reduce the number of animals raised for hides. The student wants to argue that cultured leather production may be useful in responding to a change in consumer behavior: buyers increasingly want animal-free materials that still look and feel like traditional leather.

Which quotation from a researcher would most effectively support the student's claim?

- A) "Consumers often overestimate the effect that using less packaging has on the environmental impact of leather goods."
- B) "The texture of animal leather differs across species and is influenced by tanning methods."
- C) "A growing global population will contribute to greater demand for many kinds of consumer products this century."
- D) "Surveys show that many shoppers prefer animal-free materials when those materials preserve the durability and appearance associated with traditional leather."

Answer: D

Question 13

Skill: Command of Evidence - Textual

Born in Cape Verde in 1931, singer and composer Lurdes Pina helped shape the *nova morna* movement, which began in the 1950s and then spread through Lusophone Africa. Pina traveled widely, collecting island songs and urban dance rhythms. Scholars say the movement linked traditional Cape Verdean forms to modern realities of migration and political change. As it spread, the movement incorporated national foundations beyond Cape Verde into its songs.

Which detail about songs associated with *nova morna*, if true, would best illustrate the underlined claim?

- A) Many feature political commentary addressing issues that stemmed from shared experiences of Portuguese colonial rule.
- B) Many were performed only in Cape Verdean Creole rather than in Portuguese.
- C) Many included rhythms from Angolan semba, a dance-music style that had developed outside Cape Verde.
- D) Many were recorded in studios built in Praia during the late 1950s.

Answer: C

Question 14

Skill: Inferences

The National Environmental Review Act requires agencies to evaluate environmental effects of proposed actions. Certain categorical exclusions allow quick review for actions that normally do not have significant effects. In 2020, a revised rule allowed agencies to use categorical exclusions even when many small projects might together have a significant environmental effect. Environmental groups warned that this revision could be damaging.

Which choice most logically completes the text?

- A) The revised rule would require agencies to complete longer reviews for actions that had no environmental effects.
- B) The revised rule would prohibit categorical exclusions for actions that normally have minimal effects.
- C) The earlier rule made it impossible for agencies to approve any highway repair projects.
- D) The revised rule could allow many projects with individually small effects to avoid review even when their combined effects are significant.

Answer: D

Question 15

Skill: Inferences

Microbial fuel cells use bacteria to produce electricity. Some bacteria release electrons through a chain of redox reactions before the electrons reach an electrode, but the process is inefficient. In one experiment, researchers added silver nanoparticles to the carbon paper covering the electrode, and power output increased. Since silver conducts electricity well, the researchers hypothesized that the nanoparticles improved the cell by allowing _____.

Which choice most logically completes the text?

- A) the bacteria to multiply until they produced more waste than the electrode could hold.
- B) the redox reactions to stop producing electrons altogether.
- C) electrons to be stored permanently inside the bacterial cells.
- D) electrons to bypass some inefficient reactions and transfer more directly to the electrode.

Answer: D

Question 16

Skill: Standard English Conventions - Boundaries

In *Border Atlas*, artist Reina Solis combines archival photographs, hand-drawn maps, and recorded interviews to challenge conventional ideas about ____ she is often credited with expanding the possibilities of documentary art.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) migration, memory, and trade, and
- B) migration, memory and trade and
- C) migration, memory, and trade and
- D) migration memory, and trade, and

Answer: A

Question 17

Skill: Standard English Conventions - Verbs

One of the earliest surviving dictionaries of the Aymara language, compiled by missionary Ludovico Bertonio in the seventeenth century, ____ the attention of linguists interested in colonial-era language contact.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) have drawn
- B) has drawn
- C) draw
- D) drawing

Answer: B

Question 18

Skill: Standard English Conventions - Possessives

After comparing several ____ measurements, the engineering team concluded that the bridge sensors were reporting the same vibration pattern on different days.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) scientist's
- B) scientists
- C) scientists'
- D) scientist

Answer: C

Question 19

Skill: Standard English Conventions - Boundaries

Dr. Ravi Menon ____ argues that early weather diaries can reveal how farmers understood climate before modern instruments were widely available.

Which choice completes the text so that it conforms to the conventions of Standard English?

- A) a historian of agriculture,
- B) a historian of agriculture
- C) a historian of agriculture;
- D) a historian, of agriculture,

Answer: A

Question 20

Skill: Transitions

Desert varnish forms slowly on exposed rock surfaces when tiny mineral particles bind to the stone. _____ stalactites grow gradually as mineral-rich water drips from cave ceilings.

Which choice completes the text with the most logical transition?

- A) Similarly,
- B) However,
- C) For instance,
- D) Instead,

Answer: A

Question 21

Skill: Transitions

The new library design uses large windows to reduce the need for electric lighting during the day. _____ the same windows can increase cooling costs in summer unless they are shaded.

Which choice completes the text with the most logical transition?

- A) In addition,
- B) However,
- C) For example,
- D) Therefore,

Answer: B

Question 22

Skill: Transitions

When a violin string is tightened, it vibrates faster and produces a higher pitch. _____ musicians adjust string tension carefully before performances.

Which choice completes the text with the most logical transition?

- A) For this reason,
- B) By contrast,
- C) Nevertheless,
- D) Previously,

Answer: A

Question 23

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Coral bells and foamflowers are perennial plants.
- Both can grow in partial shade.
- Both are commonly used in woodland gardens.
- Coral bells are often grown for colorful foliage.
- Foamflowers are often grown for small white flowers.

The student wants to emphasize a similarity between coral bells and foamflowers.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Both coral bells and foamflowers are perennial plants that can grow in partial shade.
- B) Coral bells are grown for colorful foliage, while foamflowers are grown for white flowers.
- C) Woodland gardens often include plants with different leaf colors and flower shapes.
- D) Foamflowers produce small white flowers and are commonly planted in gardens.

Answer: A

Question 24

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The Codex Aralia is an illustrated manuscript.
- It is believed to have been produced in the 1400s.
- The identity of the illustrator is unknown.
- Some scholars attribute the manuscript to a workshop in Bruges.

The student wants to emphasize uncertainty about the Codex Aralia.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) The Codex Aralia is an illustrated manuscript believed to have been produced in the 1400s.
- B) Although some scholars attribute the Codex Aralia to a workshop in Bruges, the manuscript's illustrator is unknown.
- C) The Codex Aralia is one of several illustrated manuscripts associated with Bruges.
- D) A manuscript produced in the 1400s can preserve information about artistic workshops.

Answer: B

Question 25

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- A pangram is a sentence that uses every letter of an alphabet at least once.
- Pangrams are often used to display typefaces.
- "Pack my box with five dozen liquor jugs" is an English pangram.
- The sentence uses every letter of the English alphabet.

The student wants to define pangram and give an example.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) A pangram is a sentence that uses every letter of an alphabet at least once; for example, "Pack my box with five dozen liquor jugs" uses every letter of the English alphabet.
- B) Pangrams are often used to display typefaces, including typefaces designed for the English alphabet.
- C) "Pack my box with five dozen liquor jugs" is more memorable than many other English sentences.
- D) A sentence can be useful for designers even when its subject is not important.

Answer: A

Question 26

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- The Vega probe launched in 2031.
- The Mira probe launched in 2035.
- Both probes were designed to study the outer planets.
- The Mira probe carried a more advanced spectrometer than the Vega probe.

The student wants to compare the two probes in terms of launch date and equipment.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Both the Vega and Mira probes were designed to study the outer planets.
- B) Launched four years after Vega, Mira carried a more advanced spectrometer.
- C) The Vega probe launched in 2031 and was designed to study the outer planets.
- D) The Mira probe had a spectrometer, an instrument often used in planetary research.

Answer: B

Question 27

Skill: Rhetorical Synthesis

While researching a topic, a student has taken the following notes:

- Writer Amina Qureshi published her first poetry collection in 1998.
- She published her essay collection *Unfinished Maps* in 2006.
- Critics say *Unfinished Maps* expanded themes that appeared in her poems.
- Both books discuss migration and memory.

The student wants to indicate the chronological relationship between Qureshi's poetry and essays.

Which choice most effectively uses relevant information from the notes to accomplish this goal?

- A) Qureshi's 2006 essay collection *Unfinished Maps* expanded themes of migration and memory that had appeared in her 1998 poetry collection.
- B) Migration and memory are important themes in both poetry and nonfiction essays.
- C) Critics have discussed Qureshi's work because it appears in more than one genre.
- D) Qureshi published *Unfinished Maps*, an essay collection about migration and memory.

Answer: A

SECTION 2, MODULE 1: Math

Question 1

Skill: Linear Equations in One Variable

If $5x + 7 = 32$, what is the value of x ?

Which choice is correct?

- A) 3
- B) 4
- C) 5
- D) 6

Answer: C

Solution: Subtract 7 from both sides: $5x = 25$. Divide by 5: $x = 5$.

Question 2

Skill: Linear Functions

A line passes through the points (2, 7) and (6, 19). What is the slope of the line?

Which choice is correct?

- A) 2
- B) 3
- C) 4
- D) 6

Answer: B

Solution: Slope = $(19 - 7)/(6 - 2) = 12/4 = 3$.

Question 3

Skill: Percentages

A jacket originally cost \$80. During a sale, the price was reduced by 25%. What was the sale price, in dollars?

Which choice is correct?

- A) 20
- B) 55
- C) 60
- D) 75

Answer: C

Solution: 25% of 80 is 20, so the sale price is $80 - 20 = 60$ dollars.

Question 4

Skill: Linear Functions

The function f is defined by $f(x) = 4x - 9$. What is $f(8)$?

Which choice is correct?

- A) 17
- B) 21
- C) 23
- D) 32

Answer: C

Solution: $f(8) = 4(8) - 9 = 32 - 9 = 23$.

Question 5

Skill: Angles

Two angles of a triangle measure 48 degrees and 67 degrees. What is the measure, in degrees, of the third angle?

Which choice is correct?

- A) 55
- B) 60
- C) 65
- D) 70

Answer: C

Solution: The angles in a triangle sum to 180 degrees. The third angle is $180 - 48 - 67 = 65$ degrees.

Question 6

Skill: Data Analysis - Mean

The numbers 6, 8, 10, 12, and 14 are in a data set. What is the mean of the data set?

Which choice is correct?

- A) 8
- B) 9
- C) 10
- D) 12

Answer: C

Solution: The sum is 50 and there are 5 numbers, so the mean is $50/5 = 10$.

Question 7

Skill: Systems of Linear Equations

Which ordered pair (x, y) is the solution to the system $x + y = 11$ and $x - y = 3$?

Which choice is correct?

- A) (4, 7)
- B) (7, 4)
- C) (8, 3)
- D) (11, 3)

Answer: B

Solution: Add the equations: $2x = 14$, so $x = 7$. Then $7 + y = 11$, so $y = 4$.

Question 8

Skill: Equivalent Expressions

Which expression is equivalent to $3(2x - 5) + 4x$?

Which choice is correct?

- A) $6x - 15$
- B) $10x - 15$
- C) $10x - 5$
- D) $14x - 15$

Answer: B

Solution: Distribute: $3(2x - 5) = 6x - 15$. Add $4x$ to get $10x - 15$.

Question 9

Skill: Area

A rectangle has length 13 centimeters and width 6 centimeters. What is its area, in square centimeters?

Which choice is correct?

- A) 19
- B) 38
- C) 72
- D) 78

Answer: D

Solution: Area of a rectangle = length times width = $13 * 6 = 78$.

Question 10

Skill: Data Analysis - Scatterplots

[Graph: A scatterplot shows points clustered closely around a line that rises from left to right.]

Which statement best describes the association shown in the scatterplot?

Which choice is correct?

- A) There is a positive association.
- B) There is a negative association.
- C) There is no association.
- D) The association is perfectly constant.

Answer: A

Solution: Because the points generally rise as x increases, the association is positive.

Question 11

Skill: Exponential Functions

A population of bacteria doubles every hour. If there are 150 bacteria at 1:00 p.m., how many bacteria will there be at 4:00 p.m.?

Which choice is correct?

- A) 300
- B) 450
- C) 600
- D) 1,200

Answer: D

Solution: From 1:00 to 4:00 is 3 hours, so the population doubles 3 times: $150 * 2^3 = 150 * 8 = 1,200$.

Question 12

Skill: Polynomial Evaluation

For $p(x) = x^2 - 3x + 2$, what is $p(5)$?

Which choice is correct?

- A) 8
- B) 10
- C) 12
- D) 16

Answer: C

Solution: $p(5) = 5^2 - 3(5) + 2 = 25 - 15 + 2 = 12$.

Question 13

Skill: Linear Inequalities

Which value of x satisfies $2x - 7 > 9$?

Which choice is correct?

- A) 6
- B) 7
- C) 8
- D) 9

Answer: D

Solution: $2x - 7 > 9$ gives $2x > 16$, so $x > 8$. Of the choices, only 9 satisfies the inequality.

Question 14

Skill: Ratios and Proportions

A recipe uses 3 cups of flour for every 2 cups of milk. If 12 cups of flour are used, how many cups of milk are needed?

Which choice is correct?

- A) 6
- B) 8
- C) 10
- D) 18

Answer: B

Solution: The flour amount is multiplied by 4, so the milk amount is $2 * 4 = 8$ cups.

Question 15

Skill: Coordinate Geometry

What is the y -intercept of the line $y = -2x + 11$?

Which choice is correct?

- A) -2
- B) 2
- C) 9
- D) 11

Answer: D

Solution: In $y = mx + b$, the y -intercept is b . Here $b = 11$.

Question 16

Skill: Function Notation

If $g(x) = x + 4$ and $h(x) = 2x$, what is $h(g(3))$?

Which choice is correct?

- A) 10
- B) 12
- C) 14
- D) 16

Answer: C

Solution: $g(3) = 3 + 4 = 7$, and $h(7) = 2(7) = 14$.

Question 17

Skill: Quadratic Functions

The equation $y = (x - 4)^2 + 6$ is given. What is the minimum value of y ?

Which choice is correct?

- A) 4
- B) 6
- C) 10
- D) 16

Answer: B

Solution: The expression $(x - 4)^2$ is at least 0, so the minimum value of y is $0 + 6 = 6$.

Question 18

Skill: Data Analysis - Median

The data set 4, 9, 11, 12, 20, 21 has how many values greater than the median?

Which choice is correct?

- A) 2
- B) 3
- C) 4
- D) 5

Answer: B

Solution: The median is the average of the 3rd and 4th values: $(11 + 12)/2 = 11.5$. Values greater than 11.5 are 12, 20, and 21, so there are 3.

Question 19

Skill: Linear Equations in One Variable

A number n is 6 more than twice 11. What is the value of n ?

Answer: 28

Solution: Twice 11 is 22, and 6 more is 28.

Question 20

Skill: Percentages

A club has 45 members. If 60% of the members attended a meeting, how many members attended?

Answer: 27

Solution: 60% of 45 is $0.60 \cdot 45 = 27$.

Question 21

Skill: Systems of Linear Equations

If $a + b = 18$ and $a = 5b$, what is the value of a ?

Answer: 15

Solution: Substitute $a = 5b$ into $a + b = 18$: $5b + b = 18$, so $6b = 18$ and $b = 3$. Thus $a = 15$.

Question 22

Skill: Geometry - Circles

A circle has radius 7. What is the circumference of the circle divided by π ?

Answer: 14

Solution: Circumference is $2\pi r = 14\pi$. Dividing by π gives 14.

SECTION 2, MODULE 2: Math

Question 1

Skill: Linear Equations in One Variable

If $(3x - 5)/4 = 7$, what is the value of x ?

Which choice is correct?

- A) 9
- B) 10
- C) 11
- D) 12

Answer: C

Solution: Multiply both sides by 4: $3x - 5 = 28$. Then $3x = 33$, so $x = 11$.

Question 2

Skill: Exponential Equations

For what value of x is $2^{(x + 1)} = 32$?

Which choice is correct?

- A) 3
- B) 4
- C) 5
- D) 6

Answer: B

Solution: $32 = 2^5$, so $x + 1 = 5$ and $x = 4$.

Question 3

Skill: Quadratic Equations

The equation $x^2 - 10x + c = 0$ has exactly one real solution. What is the value of c ?

Which choice is correct?

- A) 16
- B) 20
- C) 25
- D) 100

Answer: C

Solution: A quadratic has exactly one real solution when its discriminant is 0. $(-10)^2 - 4(1)c = 0$, so $100 - 4c = 0$ and $c = 25$.

Question 4

Skill: Circle Equations

In the xy -plane, a circle has equation $(x - 3)^2 + (y + 2)^2 = 49$. What is the radius of the circle?

Which choice is correct?

- A) 2
- B) 3
- C) 7
- D) 49

Answer: C

Solution: A circle in standard form has r^2 on the right side. Here $r^2 = 49$, so $r = 7$.

Question 5

Skill: Statistics - Standard Deviation

Data set A consists of 10, 10, 10, 10, and 10. Data set B consists of 6, 8, 10, 12, and 14. Which statement is true?

Which choice is correct?

- A) Both data sets have the same standard deviation.
- B) Data set A has the greater standard deviation.
- C) Data set B has the greater standard deviation.
- D) Neither data set has a mean.

Answer: C

Solution: Data set A has no spread, so its standard deviation is 0. Data set B has values spread around 10, so it has the greater standard deviation.

Question 6

Skill: Systems of Linear Equations

The line $y = 3x + 2$ intersects the line $y = -x + 18$ at point (a, b) . What is $a + b$?

Which choice is correct?

- A) 10
- B) 14
- C) 18
- D) 22

Answer: C

Solution: Set $3x + 2 = -x + 18$. Then $4x = 16$, so $x = 4$. $y = 3(4) + 2 = 14$. Thus $a + b = 4 + 14 = 18$.

Question 7

Skill: Right Triangles and Trigonometry

In a right triangle, one acute angle has sine $5/13$. If the hypotenuse is 39, what is the length of the side opposite that angle?

Which choice is correct?

- A) 5
- B) 13
- C) 15
- D) 34

Answer: C

Solution: $\sin(\theta) = \text{opposite}/\text{hypotenuse} = 5/13$. With hypotenuse 39, $\text{opposite} = (5/13) \cdot 39 = 15$.

Question 8

Skill: Systems and Parameters

For what value of k does the system $y = 2x + 5$ and $y = 2x + k$ have no solution?

Which choice is correct?

- A) 0
- B) 2
- C) 5
- D) 7

Answer: D

Solution: Parallel distinct lines have the same slope and different intercepts. The first intercept is 5, so any k not equal to 5 gives no solution. Among the choices, 7 works.

Question 9

Skill: Inequalities and Word Problems

A concert hall charges \$18 per ticket plus a one-time service fee of \$12 for an order. Which inequality gives the number t of tickets that can be purchased for at most \$150?

Which choice is correct?

- A) $18t + 12 \leq 150$
- B) $18t - 12 \leq 150$
- C) $12t + 18 \leq 150$
- D) $30t \leq 150$

Answer: A

Solution: The total cost is $18t + 12$. At most 150 means less than or equal to 150, so $18t + 12 \leq 150$.

Question 10

Skill: Polynomial Factors

Which expression is equivalent to $x^2 + 7x + 12$?

Which choice is correct?

- A) $(x + 3)(x + 4)$
- B) $(x + 2)(x + 6)$
- C) $(x - 3)(x - 4)$
- D) $(x - 2)(x - 6)$

Answer: A

Solution: The numbers 3 and 4 have product 12 and sum 7, so $x^2 + 7x + 12 = (x + 3)(x + 4)$.

Question 11

Skill: Exponential Functions

[Table: x - 0, 1, 2, 3. $f(x)$ - 5, 15, 45, 135.]

Which equation could define f ?

Which choice is correct?

- A) $f(x) = 5 + 10x$
- B) $f(x) = 5(3^x)$
- C) $f(x) = 3(5^x)$
- D) $f(x) = 15x$

Answer: B

Solution: Each time x increases by 1, $f(x)$ is multiplied by 3. Since $f(0) = 5$, $f(x) = 5(3^x)$.

Question 12

Skill: Geometry - Area

A triangle has a base of 18 inches and an area of 117 square inches. What is the height of the triangle, in inches?

Which choice is correct?

- A) 6.5
- B) 9
- C) 13
- D) 18

Answer: C

Solution: $\text{Area} = \frac{1}{2}bh$. Thus $117 = \frac{1}{2}(18)h = 9h$, so $h = 13$.

Question 13

Skill: Nonlinear Systems

If $y = x^2$ and $y = 4x - 3$, which of the following is an x-coordinate of an intersection point of the two graphs?

Which choice is correct?

- A) 1
- B) 2
- C) 3
- D) 4

Answer: A

Solution: Set $x^2 = 4x - 3$, so $x^2 - 4x + 3 = 0$. Factor: $(x - 1)(x - 3) = 0$. The x-coordinates are 1 and 3; among the choices, 1 works.

Question 14

Skill: Rates

Machine A prints 120 pages in 6 minutes. Machine B prints 150 pages in 10 minutes. How many more pages per minute does Machine A print than Machine B?

Which choice is correct?

- A) 3
- B) 5
- C) 7
- D) 10

Answer: B

Solution: Machine A prints $120/6 = 20$ pages per minute. Machine B prints $150/10 = 15$ pages per minute. The difference is 5.

Question 15

Skill: Linear Models

A taxi company charges a flat fee of \$4 plus \$2.75 per mile. Which equation gives the total cost C, in dollars, for a ride of m miles?

Which choice is correct?

- A) $C = 4m + 2.75$
- B) $C = 2.75m + 4$
- C) $C = 6.75m$
- D) $C = 2.75(m + 4)$

Answer: B

Solution: The variable part is $2.75m$ and the flat fee is 4, so $C = 2.75m + 4$.

Question 16

Skill: Quadratic Functions

The function q is defined by $q(x) = x^2 - 6x + 14$. What is the minimum value of $q(x)$?

Which choice is correct?

- A) 3
- B) 5
- C) 9
- D) 14

Answer: B

Solution: Complete the square: $x^2 - 6x + 14 = (x - 3)^2 + 5$. The minimum value is 5.

Question 17

Skill: Ratios and Units

A car travels 132 miles using 4 gallons of gasoline. At this rate, how many miles can the car travel using 9 gallons of gasoline?

Answer: 297

Solution: The rate is $132/4 = 33$ miles per gallon. For 9 gallons, distance = $33 * 9 = 297$ miles.

Question 18

Skill: Algebra - Linear Equations

If $7m - 4 = 3m + 24$, what is the value of m ?

Answer: 7

Solution: Subtract $3m$ from both sides: $4m - 4 = 24$. Add 4: $4m = 28$. Divide by 4: $m = 7$.

Question 19

Skill: Geometry - Volume

A rectangular prism has length 8, width 5, and height h . Its volume is 280 cubic units. What is h ?

Answer: 7

Solution: Volume = length * width * height, so $280 = 8 * 5 * h = 40h$. Thus $h = 7$.

Question 20

Skill: Quadratic Equations

One solution to $x^2 - 9x + 20 = 0$ is 4. What is the other solution?

Answer: 5

Solution: Factor: $x^2 - 9x + 20 = (x - 4)(x - 5)$. The other solution is 5.

Question 21

Skill: Systems of Linear Equations

If $2x + 3y = 31$ and $x = 5$, what is the value of y ?

Answer: 7

Solution: Substitute $x = 5$: $2(5) + 3y = 31$, so $10 + 3y = 31$. Then $3y = 21$ and $y = 7$.

Question 22

Skill: Advanced Math - Functions

For $f(x) = 2x^2 + 3x - 5$, what is $f(-3)$?

Answer: 4

Solution: $f(-3) = 2(9) + 3(-3) - 5 = 18 - 9 - 5 = 4$.

Answer Key

SECTION 1, MODULE 1: Reading and Writing

1. C 2. A 3. A 4. B 5. A 6. A 7. D 8. A 9. A 10. B 11. B 12. A
